I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Afghanistan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that! It's great that you're thinking carefully about your future. Since you're 16, fluent in Danish, and just finished primary school in Denmark, you're at a point where you can choose between several solid educational paths depending on your interests, strengths, and career goals. Here's a breakdown of your main options in Denmark:

## 1. Gymnasiale uddannelser (Upper Secondary Education)

If you're interested in further academic study and possibly going to university later:

### Options:

- **STX (Studentereksamen):** Focuses on general academic subjects – great if you enjoy subjects like Danish, history, science, and languages.
- **HHX (Handelshøjskoleeksamen):** Focuses on business, economics, and international trade.
- **HTX (Teknisk eksamen):** Focuses on science, technology, and engineering.
- **HF (Højere forberedelseseksamen):** A 2-year academic track, good if you prefer a shorter path and want to go on to professions like nursing, teaching, or social work.

✓ *Best for you if:*

You enjoy school subjects and think you might want to study at university in the future.

## 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

If you're more into practical work or want to start working earlier:

### Fields:

- Health and care
- Mechanics and technology
- IT and electronics
- Cooking, hospitality
- Construction and carpentry

You usually combine school learning with an apprenticeship.

✓ *Best for you if:*

You like hands-on learning, want to get a job sooner, or are interested in a specific trade.

---

### 💡 3. Kombinationsuddannelser (EUX)

This combines vocational training with academic courses, giving you both a professional qualification **and** access to higher education later.

✓ *Best for you if:*

You want job skills **and** want to keep the door open for university or other higher education later.

---

### 🔍 Choosing Based on Interests

Ask yourself:

- Do I enjoy working with people, numbers, technology, or creativity?
  - Do I want to start working sooner or study longer?
  - Do I prefer books or hands-on experience?
- 

### 🕒 My Suggestion (Based on What You Shared):

If you're doing well academically and not sure what career you want yet, **STX or HF** could give you time to figure it out. If you already know you like tech, business, or a specific craft, then **HTX, HHX, or EUD/EUX** might be better.

You can also talk to a **UU-vejleder (Youth Guidance Counselor)** at your school or kommune. They're really helpful for planning your next step based on your situation and goals.

---

Would you like help exploring a specific field, like IT, health, business, or something else you're curious about?
