I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Germany. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that — and congratulations on finishing primary school! Since you're 16 and living in Denmark, you're likely at the point where you're choosing between the main upper secondary education paths. The "right" path depends on your interests, goals, and how you like to learn. Here's a breakdown of your main options and when each might be a good fit:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academic programs that prepare you for university.

a) STX (Studentereksamen) – General Upper Secondary School

- **Good for:** If you enjoy academic subjects like humanities, social sciences, or natural sciences.
- **Length:** 3 years.
- **Outcome:** Qualifies you for university and most higher education programs.

b) HHX (Higher Commercial Examination Programme)

- **Good for:** If you're interested in business, economics, and languages.
- **Length:** 3 years.
- **Outcome:** Leads to business-oriented higher education.

c) HTX (Higher Technical Examination Programme)

- **Good for:** If you like science, technology, IT, or engineering.
- **Length:** 3 years.
- **Outcome:** Great for university programs in STEM (science, tech, engineering, math).

d) HF (Higher Preparatory Examination Programme)

- **Good for:** If you want a shorter, more flexible academic route (especially good if you took a break or want quicker entry into further education).
- **Length:** 2 years.
- **Outcome:** Can qualify you for certain higher education programs.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

- **Good for:** If you want to start working sooner or like learning by doing.
- **Focus:** Trades, crafts, or technical professions like carpentry, electrician, healthcare, or IT support.
- **Length:** Typically 2–5 years, including apprenticeships.
- **Outcome:** You get a skilled trade qualification and can also pursue further education later.

3. Kombinerede eller alternative veje

- **EUX (Vocational + Academic):** A hybrid between vocational training and academic education. You can learn a trade and still qualify for university.
 - **Good for:** If you want practical skills and want to keep university as an option.

How to Decide?

Ask yourself:

- Do I want to go to university? → Choose STX, HHX, HTX, or HF.
- Do I want a more hands-on career path? → Choose EUD or EUX.
- Do I like business, science, or arts? → Match with HHX, HTX, or STX accordingly.
- Am I more of a practical learner than a theoretical one? → EUD or EUX could be better.

Your German Background

Since your parents are from Germany:

- You might consider learning more German formally or adding it as a strong subject.
- Some international schools or programs (like the IB – International Baccalaureate) could be relevant if you're considering studying abroad later.

Want Help Choosing?

If you tell me a bit more about your interests — like subjects you enjoy, whether you like hands-on or academic learning, and what kind of work you might like in the future — I can give you a more personal recommendation.

Would you like to go into university later? Or are you more interested in starting work or an apprenticeship after school?
