I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Algeria. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's a great question, and it's awesome that you're thinking seriously about your future! Since you're 16 and just finished primary school in Denmark (which typically includes **Folkeskole up to 9th or 10th grade**), you now have several educational options to choose from, depending on your interests, goals, and preferred way of learning.

Here's a breakdown of your main options in Denmark after primary school:

🎓 1. Gymnasiale Uddannelser (General Upper Secondary Education)

These prepare you for higher education (like university).

Best if you enjoy school subjects and might want to study at university later.

Options include:

- **STX (Alment Gymnasium)** – Focus on general academic subjects like languages, science, and humanities.
- **HHX (Handelsgymnasium)** – Focus on business, economics, and marketing.
- **HTX (Teknisk Gymnasium)** – Focus on technology, natural sciences, and IT.
- **HF (Højere Forberedelseseksamen)** – Shorter, more practical 2-year program, good if you want a more flexible path to higher education.

Recommended if you:

- Like studying
- Might want to go to university
- Are not sure what you want yet (STX is the most general)

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

This is hands-on training for a job – often includes apprenticeships.

Best if you want to learn a trade or start working faster.

Examples:

- Electrician, carpenter, mechanic
- Hairdresser, chef, health worker (social and healthcare education – SOSU)

Recommended if you:

- Prefer practical work over academic schoolwork
 - Want to start earning money sooner
 - Want a clear path to a job
-

3. EUX – Vocational + Academic Combined

This combines vocational training with a gymnasial-level education.

Best of both worlds: You can both work in a trade or continue to higher education.

Recommended if you:

- Want job skills AND the option to go to university
 - Can handle a more demanding program (it's harder than just EUD)
-

How to Choose?

Ask yourself:

- Do I like learning in a classroom (books, exams), or do I prefer hands-on learning?
 - Do I want to go to university, or start working sooner?
 - What subjects or activities do I enjoy most (e.g., science, business, art, helping people)?
-

My Personal Suggestion:

Since you're fluent in Danish, have roots in both Denmark and Algeria, and just finished primary school, you're in a great position. If you're not sure yet what you want to do, I'd recommend:

- ♦ **STX** – If you want to keep your options open and explore your interests
 - ♦ **EUX** – If you're interested in learning a skill but want the chance to go to university later
-

If you tell me a bit more about what you're interested in (subjects, hobbies, jobs you think are cool), I can give you a more personalized recommendation. Would you like to do that?
