I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Algeria. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing that—it's great that you're already thinking about your next steps. Since you're 16, finished primary school in Denmark (likely *folkeskole*), and are fluent in Danish, you now have a few solid educational options depending on your interests, strengths, and goals.

Here's a breakdown of the most common paths available after 9. *klasse* (or 10. *klasse* if you're planning to take an extra year):

♦ 1. Gymnasiale Uddannelser (Upper Secondary School)

These are academically focused and prepare you for university.

A. STX (Studentereksamen)

- Broad general education.
- Good if you're interested in humanities, social sciences, or science.
- 3 years.

B. HTX (Teknisk Gymnasium)

- Focus on technology and science.
- Great for those into engineering, IT, biology, etc.
- 3 years.

C. HHX (Handelsgymnasium)

- Focus on business, economics, and international trade.
- Ideal if you're interested in entrepreneurship, business, or finance.
- 3 years.

D. HF (Højere Forberedelseseksamen)

- Shorter and more flexible (2 years).
- Often for students who want a more practical path to further education.

■ **Recommended if:** You enjoy school subjects, want to go to university, and are still figuring out your specific interests.

◆ 2. Erhvervsuddannelser (Vocational Education – EUD/EGU)

These combine school and apprenticeship.

- Become a skilled worker: electrician, carpenter, mechanic, hairdresser, chef, healthcare assistant, etc.
- You can start working earlier and earn a salary during your training.
- Takes 3–5 years depending on the field.

■ **Recommended if:** You prefer hands-on learning, want to start working sooner, or have a clear idea of a practical career path.

◆ 3. Kombinerede Veje (EUX)

A mix of academic and vocational education.

- Get both a vocational qualification and a study qualification (like STX).
- Keeps university options open while also preparing you for work.

■ **Recommended if:** You're ambitious, want flexibility, and like both academic and practical learning.

Other Things to Consider:

- **10. Klasse:** You can take an optional extra year to improve grades, mature, or decide on a direction. Could also be helpful if you're unsure or want to boost confidence.
 - **Language and background:** With Algerian roots and fluency in Danish, you might consider using your language/cultural knowledge in areas like international business, translation, diplomacy, teaching, or multicultural work.
 - **Personal interests:** Think about what excites you—science, people, business, design, mechanics? That should influence your decision.
-

Want Help Deciding?

If you tell me:

- What subjects you liked or were good at in school
- What kind of work sounds exciting to you
- Whether you want to go to university or start working sooner

...I can give a much more tailored recommendation 😊

Would you like to explore that?
