

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Singapore. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Great! Since you've finished primary school in Denmark and you're 16, you're at a key decision point in the Danish education system. Here are your main options, and I'll also give you a recommendation based on your background:

🎓 Main Educational Paths After Primary School in Denmark

1. Gymnasiale uddannelser (Upper Secondary Education – Academic Focus)

These prepare you for university:

- **STX (Alment gymnasium)** – General academic high school.
- **HHX (Handelsgymnasium)** – Focus on business and economics.
- **HTX (Teknisk gymnasium)** – Focus on science, tech, and innovation.
- **HF (Højere forberedelseseksamen)** – A shorter, more practical two-year option (for those who may not want the full three-year programs).

2. Erhvervsuddannelser (VET – Vocational Education and Training)

- These combine school and apprenticeships.
- Good if you want to work sooner or have a specific trade in mind (e.g., electrician, chef, IT support).

3. International Programs (optional)

- If you're also fluent in English and thinking globally (like university in Singapore later), International Baccalaureate (IB) might be worth considering.

✅ My Recommendation for You

Since you're fluent in Danish, born in Denmark, and have Singaporean roots, you're in a unique position with global potential. Here's what I'd suggest:

🎯 Option 1: STX or HHX

- **STX** if you're not sure yet what you want to study later – it keeps your doors wide open.
- **HHX** if you're interested in international business, economics, or maybe working in Singapore or globally one day.

🧠 Why?

- These will prepare you well for university.
 - They keep your career options broad.
 - They match well with someone who has multicultural potential.
-

Bonus Option: Consider the IB

- If you're interested in studying abroad or in English (e.g., university in Singapore or internationally), an **International Baccalaureate (IB)** could be a great choice.
 - It's academically challenging but highly respected worldwide.
-

What You Should Ask Yourself

To choose the right path, think about:

- Do you enjoy academic work or more practical learning?
 - Are you interested in subjects like business, science, or humanities?
 - Do you want to study in Denmark only, or maybe abroad later?
-

If you give me a bit more info about your interests or career goals, I can tailor the advice even more.
Would you like help with that?
