I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Argentina. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you're 16, just finished primary school (likely meaning "folkeskole" in Denmark), and you're fluent in Danish, you're at an exciting point with several good educational options. The best path depends on your interests, goals, and whether you're more academically or practically inclined. Here's a breakdown of the main options available in Denmark after folkeskole, along with guidance based on different goals:

## 🎓 1. Gymnasiale Uddannelser (Upper Secondary Education)

If you enjoy academic subjects and are thinking about going to university in the future, then one of the **gymnasium** options is ideal.

### Options:

- **STX (Studentereksamen)** – Focus on humanities, natural sciences, and social sciences. Broad and university-preparatory.
- **HHX (Handelsskolens studentereksamen)** – Business and economics focus. Great if you're interested in international trade, economics, or marketing.
- **HTX (Teknisk studentereksamen)** – Focus on science, technology, and innovation. Good if you're into engineering or IT.
- **HF (Højere Forberedelseseksamen)** – A 2-year program, often for those who want a shorter path to further education.

🕒 **Best if:** You want to keep your options open, especially toward university or professions like law, teaching, science, tech, or business.

## 🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

If you prefer hands-on work or want to enter the job market sooner, vocational training might suit you.

### Examples:

- Electrician
- Carpenter
- Chef

- Hairdresser
- Social and health care worker (SOSU)
- IT-supporter

You do practical work and get paid during internships.

 **Best if:** You prefer practical learning, want to work sooner, or are passionate about a trade or service job.

### 3. Kombinationer og Alternativer

- **EUX:** Combines vocational training with academic education. You can both work in a trade and still qualify for university later.
- **Efterskole:** A 10th-grade option where you live at school for a year. Good for personal growth, trying new interests (like music, sports, or outdoor life), and meeting new people.
- **International opportunities:** Since you have Argentine roots, consider doing a study exchange or even taking a "sabbatår" (gap year) later abroad to connect with Argentina.

### What to consider when choosing:

Ask yourself:

- Do I enjoy school subjects like math, literature, or science?
- Do I prefer learning by doing?
- Do I want to go to university?
- Am I curious about working with people, tech, business, or something creative?

### My suggestion based on your background:

Since you're fluent in Danish, born and raised in Denmark, and you have international roots, you might enjoy something that keeps doors open. If you're not sure what you're passionate about yet:

 **Start with STX or HHX**, depending on whether you're more into general knowledge or business.

Later, if you discover a more practical passion, it's still possible to switch or enter the job market.

If you'd like, I can help you explore specific schools near you, or help match your interests to specific study lines ("studieretninger").

Would you like that? Or do you already have a subject or career you're curious about?
