I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Nepal. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thank you for sharing that — and congrats on finishing primary school! That's a big milestone. Since you're in Denmark and just finished **Folkeskolen** (probably 9th or 10th grade), you're now facing an important choice: **which youth education to pursue**. There are several main paths you can take, and the best one depends on your interests, strengths, and future goals.

## 1. Gymnasiale uddannelser (General upper secondary education)

This is the academic route, good if you think you want to go to university later.

### The main types:

- **STX (Almen studentereksamen)**: Broad academic education, good for humanities, social sciences, or science.
- **HHX (Højere handelseksamen)**: Focus on business, economics, and international trade.
- **HTX (Højere teknisk eksamen)**: Focus on technology, science, and engineering.
- **HF (Højere forberedelseseksamen)**: A shorter 2-year general academic program, good if you prefer a less traditional school setup.

✓ Choose this path if:

- You like school subjects like math, languages, science, history, or business.
- You're considering university (e.g., engineer, doctor, teacher, economist, etc.).
- You want to keep your options open.

---

## 2. Erhvervsuddannelser (Vocational education and training - EUD)

This is the practical path that prepares you for a job or skilled trade.

Examples include:

- Electrician
- Mechanic
- Carpenter
- Healthcare assistant
- Hairdresser

- Chef
- IT support

Usually 4 years, includes both school and apprenticeship.

✓ Choose this path if:

- You like working with your hands or practical tasks.
  - You want to start working sooner.
  - You want to become skilled in a trade and possibly start your own business.
- 

### 3. Kombinerede forløb (EUX)

A mix of both academic and vocational education. You get both a studentereksamen and a vocational qualification.

✓ Great choice if:

- You want to keep the door open for university **and** be able to work right after.
  - You're unsure but want a strong and flexible foundation.
- 

### 4. Other options

If you're not sure yet or need more time:

- **10. klasse:** One more year to mature, try new subjects, or prepare for a specific education path.
  - **Efterskole:** A boarding school year with focus on personal development and often special interests (sports, music, tech, etc.).
  - **International programs:** IB (International Baccalaureate) if you're strong in English and want global opportunities.
- 

### My Recommendation:

Since you're fluent in Danish and have roots both in Denmark and Nepal, you have a unique cultural perspective. Think about:

- What subjects do you enjoy most?
- Do you like theory or practice more?
- Do you have any dreams (e.g. business, healthcare, tech, art)?

If you're interested in university and enjoy school subjects → **STX, HHX, or HTX** depending on your interests.

If you like more hands-on, career-oriented learning → **EUD or EUX** are very solid and respected paths.

---

Would you like help figuring out which specific programs might suit your interests (like tech, health, design, business, etc.)? I can help you narrow it down further.
