I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Central African Republic. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you've completed primary school and are thinking ahead about your future—this is a big step. Since you're in Denmark, you have several solid options after **primary school (folkeskolen)**, depending on your interests, skills, and long-term goals.

Here's a breakdown of your main educational paths after 9th grade (or 10th grade, if you decide to do an extra year):

1. Gymnasium (STX, HHX, HTX, HF)

These are academically focused upper secondary schools and prepare you for **university**.

- **STX (Alment Gymnasium)** – General education with subjects like history, science, literature, and languages. Good if you're not sure yet what you want to study.
- **HHX (Handelsskolen)** – Focus on **economy, business, and international trade**. Great for business-minded students.
- **HTX (Teknisk Gymnasium)** – Focus on **technology, science, and engineering**. Good if you're into computers, physics, or technology.
- **HF (Højere Forberedelseseksamen)** – A 2-year program, more flexible and practical, often for students who prefer a less traditional route or need a second chance.

✓ **Recommended if:** You're academically strong and interested in going to university later.

2. Erhvervsuddannelse (EUD - Vocational Education and Training)

These are vocational programs where you learn a **trade or profession**, combining school and apprenticeships.

Examples:

- Electrician
- Carpenter
- Mechanic
- Hairdresser
- Social and health assistant (SOSU)

You get paid during your apprenticeship, and you can even take an **EUX**, which combines vocational training with an upper secondary exam that lets you go to university later.

✅ **Recommended if:** You want a practical job, start earning sooner, or enjoy hands-on work.

💡 3. 10th Grade (10. klasse)

An optional year if you want more time to decide, improve your grades, or grow personally. Some 10th-grade programs are more focused on internships or project-based learning.

✅ **Recommended if:** You're unsure of your next step or want to improve your academic level.

🕒 My Suggestion Based on What You've Shared:

Since you're fluent in Danish and already navigating between two cultures, you have a unique advantage. Here's how you might decide:

- **If you like school and think about a career that needs higher education (doctor, engineer, lawyer, teacher)** → Consider **STX, HHX, or HTX**.
- **If you enjoy working with your hands or want to earn money sooner** → Look at **EUD or EUX**.
- **If you're unsure** or want more time, **10th grade** in a different environment (like an efterskole) might be valuable.

Would you like help finding specific schools or programs near where you live in Denmark? Or do you want help thinking about what career areas might suit your personality and interests?
