I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Andorra. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that! You're in an exciting phase of life, and it's great that you're thinking ahead. Since you've just finished primary school in Denmark (which ends after 9th or 10th grade), your next step depends a lot on your interests, strengths, and future goals. Here's a breakdown of the main educational paths available in Denmark after primary school, along with recommendations based on different interests:

1. Gymnasiale uddannelser (Upper Secondary Education)

This is the academic path, preparing you for university. Great if you enjoy studying subjects like languages, science, math, or social studies.

There are four main types:

- STX (Almen studentereksamen) Broad academic focus, good for university.
- HHX (Højere handelseksamen) Business-oriented, good if you're into economics or marketing.
- HTX (Højere teknisk eksamen) Focus on science, tech, and IT.
- **HF (Højere forberedelseseksamen)** Shorter (2 years), often for older students or those who prefer a more practical, less theoretical route to higher education.

Recommended if:

You want to keep your options open for university, or if you're academically inclined.

2. Erhvervsuddannelser (Vocational Education & Training - EUD)

These programs mix school and apprenticeships. You'll learn a trade like carpentry, electrician work, healthcare, or hospitality.

Recommended if:

You like working with your hands or want a more direct path into a career.

3. Kombinerede forløb (EUX)

This is a combination of vocational training and academic education. You'll learn a trade but also qualify for university.

Recommended if:

You're interested in both practical work and keeping the option for further education.

Things to Consider:

- Your interests: Do you enjoy academic subjects or more practical work?
- Your strengths: Are you better at reading, math, solving problems, or working with people?
- **Future goals**: Do you see yourself going to university? Starting work sooner? Running a business someday?

6 My Suggestion:

If you're unsure but generally do well in school and are open to university later:

Go for STX or HHX. They keep your options wide open and let you explore different subjects.

If you're more hands-on and want to start a career path soon:

Explore EUX – especially if you want both a trade and the chance to study later.

Would you like help narrowing it down based on your interests? I can ask you a few quick questions and help match you to a good fit.
