> I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Myanmar. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great place to be — you've finished primary school, you're fluent in Danish, and now you're at an important crossroads with many options open. Since you're 16 and living in Denmark, your next educational step would typically be one of the following, depending on your interests, academic strengths, and future career goals.

🇩🇰 **In Denmark, after primary school (folkeskole), your main options are:**

◆ 1. Gymnasiale uddannelser (Upper Secondary Education)

This is the academic route that prepares you for university. It usually lasts **3 years**.

➤ **Options:**

- **STX (Almen studentereksamen)** – General upper secondary, with a broad range of subjects (humanities, sciences, social sciences). Good if you're unsure or want many options later.
- **HHX (Højere handelseksamen)** – Focused on business, economics, marketing. Great if you're interested in business or entrepreneurship.
- **HTX (Højere teknisk eksamen)** – Focused on technology, science, and innovation. Good if you like science, engineering, or IT.
- **HF (Højere forberedelseseksamen)** – Shorter, 2-year program, more practical and less theoretical than STX. Often used if you want a quicker path to specific vocational programs or professional bachelor studies.

◆ 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

If you prefer **hands-on learning**, you can start a vocational education. It mixes school and internship (praktik). It usually leads to a skilled job (crafts, trades, health, IT, etc.), but you can also continue studying afterwards.

➤ **Popular fields:**

- **IT-supporter, electrician, carpenter, chef, etc.**
- **SOSU-assistent (social and healthcare)** – Especially in demand

- After an EUD, you can also choose **EUX** (a combo of vocational and academic), which lets you both get a job and be eligible for university later.

🔹 3. 10. klasse

If you're unsure what to choose, you might consider taking **10th grade**, either at your local school or at a **10. klasse center** or **efterskole** (a residential school focused on personal development, social life, and learning). It gives you more time to decide and grow.

So, What Should *You* Do?

✨ **Think about:**

- **Do you like academic study or more practical/hands-on learning?**
- **Do you have a dream job in mind?**
- **Are you interested in going to university later or starting work sooner?**
- **Would you like to study subjects like science, technology, business, or arts?**

✍️ Here's a recommendation:

If you enjoy school, are curious, and want flexibility later:

👉 **Go for STX or HHX** (especially if you might want to go to university later — and you'll have 3 years to explore different subjects).

If you prefer **hands-on work** and want to get into a profession sooner (and possibly earn money earlier):

👉 **Consider EUD or EUX**. These are respected, needed paths with strong job opportunities — and you can still go to university if you take the EUX route.

If you're **still unsure**, maybe take:

👉 **10. klasse at an efterskole** — it's a unique Danish experience that can really help you figure out what you want while building confidence and friendships.

🌍 Bonus idea:

With your Myanmar background and Danish fluency, you might have unique opportunities in **international business**, **diplomacy**, **translation**, or **cultural exchange** — especially if you learn English well (or already do!).

Would you like help figuring out which specific schools or programs are near you in Denmark? I can look that up. Or, we can explore careers that might suit your personality and interests.
