> I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Palau. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
> What educational path would you recommend for me?

Thanks for sharing your background — that's a really great start, and it's excellent that you're already thinking carefully about your next steps. At 16 in Denmark, you're at a key decision point where you can choose among several educational paths depending on your interests, strengths, and future goals.

📚 Your Options After Primary School in Denmark

Here are the main paths available after **Folkeskole (9th or 10th grade)**:

---

1. Gymnasiale Uddannelser (General Upper Secondary Education)

If you're considering university in the future, this is a strong path.

Main types:

- **STX (Almen studentereksamen):** Focus on general academic subjects (good if you're unsure but want to keep your options open).
- **HHX (Højere handelseksamen):** Business, economics, marketing – good for careers in business or entrepreneurship.
- **HTX (Højere teknisk eksamen):** Focus on science and technology – ideal if you're into engineering, IT, or science.
- **HF (Højere forberedelseseksamen):** A shorter, more flexible 2-year program, good if you're a bit more mature or need an alternative route to university.

✅ **Best if** you're interested in theoretical subjects and want to go to university later.

---

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

If you like hands-on learning and want to work sooner, this is a good path.

You learn a trade or profession through a mix of school and apprenticeship. Examples include:

- Electrician
- Carpenter
- Chef
- Healthcare assistant

- Hairdresser

✅ **Best if** you enjoy practical work, want a job faster, or prefer not to sit in classrooms all day.

3. Kombinerede Uddannelser (EUX)

This is a hybrid: you get both a vocational education **and** a studentereksamen. It gives you a profession and keeps the door open to university.

✅ **Best if** you want the job-readiness of EUD *and* the academic opportunities of gymnasium.

How to Decide?

Ask yourself:

- Do I want to go to university? → Choose **STX**, **HHX**, **HTX**, or **HF**.
- Do I want to start working earlier or do something hands-on? → Choose **EUD** or **EUX**.
- Do I have specific interests already (e.g. business, technology, science, art)? → Let that guide which gymnasium you choose.
- Am I unsure? → A broad **STX** or **HF** can keep many doors open.

My Advice Based on Your Profile

You're young, fluent in Danish, and seem thoughtful about your next steps. Here's a recommendation flow:

1. **If you're interested in a university education later:**
   → **STX** is a good all-round choice with lots of flexibility.

2. **If you're more interested in business, international work, or finance (maybe even linking Palau and Denmark someday):**
   → **HHX** could be a perfect fit.

3. **If you're into tech, science, or engineering:**
   → **HTX** is worth exploring.

4. **If you like practical work and want job skills soon, but also want to keep study options open:**
   → **EUX** gives you the best of both worlds.

Last Tips:

- Visit **open house events** at local schools (many offer tours or intro weeks).
- Talk to a **UU-vejleder (youth education counselor)** – they're free and helpful.
- Don't stress about choosing "perfectly" — the Danish system is very flexible, and switching paths is possible.

Would you like me to help you narrow it down based on your interests (e.g. subjects you enjoy or career ideas)?
