# Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mali. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's great that you're thinking seriously about your next steps—this is a good time to explore your interests and strengths. Since you're in Denmark and just finished primary school, you're probably about to choose between different youth education programs ("ungdomsuddannelser"). Here's a breakdown of your main options, and how to think about which might suit you best:

## 🔧 1. Erhvervsuddannelse (EUD) – Vocational Education and Training

**Good for:** Hands-on learners, practical skills, job opportunities right after school
**Examples of careers:** Carpenter, electrician, hairdresser, social and health care worker
**Length:** Usually 3–4 years
**You can:** Start working right away or continue to higher education later

**Recommended if:**

- You enjoy working with your hands or helping people

- You want to start working relatively soon

- You'd rather not spend many years in a classroom

## 🎓 2. Gymnasiale Uddannelser – Academic Upper Secondary Education

There are 3 main types:

- **STX (Almen studentereksamen)** – Broad, academic focus

- **HTX (Teknisk studentereksamen)** – Science and tech focus

- **HHX (Handelsstudentereksamen)** – Business and economics focus

**Good for:** Students who want to go to university later
**Length:** 3 years

**Recommended if:**

- You enjoy academic subjects (e.g., languages, science, math, social science)

- You're interested in possibly going to university later

- You're not sure yet what you want to do—this keeps many options open

## 💡 How to Choose?

Here are a few questions to ask yourself:

1. **What are you good at or interested in?**
   Science? Business? Helping people? Making things? Solving problems?
2. **Do you prefer learning by doing, or more academic work?**
3. **Would you like to go to university, or start working earlier?**

---

## 💬 A Personal Recommendation Based on What You've Said:

Since you're fluent in Danish, born and raised in Denmark, and just finishing primary school, you're in a strong position to choose any path.

If you're still exploring your interests and want to keep many doors open, **STX** might be a good place to start—it's the most general academic track and can lead to all kinds of higher education.

However, if you already know you like tech or business, **HTX** or **HHX** might give you a more focused education that matches your interests.

If you prefer practical work or want to learn a trade, **EUD** could be a great choice, and it's well-respected in Denmark.

---

## 📍 Next Step:

You can talk to your school's **UU-vejleder (Youth Guidance Counselor)** – they can help you explore your options more deeply and even visit different schools or try a **"brobygning"** (intro courses) to see what feels right.

---

Would you like help choosing between specific subjects or schools near where you live? I can help with that too.
