> I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Norway. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
> What educational path would you recommend for me?

Thanks for sharing your background! Living in Denmark with a Norwegian background gives you a great foundation — you're fluent in Danish, likely understand or can learn Norwegian easily, and you have access to some of the best education systems in the world. Since you've just finished primary school (Folkeskole, usually at age 15-16), you're now at a key decision point: **youth education (ungdomsuddannelse)**.

Here's a breakdown of the main options in Denmark after primary school, along with some guidance based on your possible interests:

📘 1. Gymnasiale uddannelser (General Upper Secondary Education)

These prepare you for university.

- **STX (Studentereksamen)** – Broad academic education with focus areas like science, humanities, or social science. Great if you want to keep many doors open.
- **HHX (Higher Commercial Examination Programme)** – Focus on business, economics, and languages. Good if you're into finance, marketing, or international business.
- **HTX (Higher Technical Examination Programme)** – Focus on science, technology, and innovation. Good if you like tech, programming, biology, or engineering.
- **HF (Higher Preparatory Examination)** – Shorter (2 years), more flexible, often for slightly older students or those who want to enter professions that require mid-length education.

✅ Choose gymnasiale education if:

- You want to go to university someday.
- You enjoy academic subjects (math, science, history, languages, etc.).
- You're not sure what career you want yet — this path keeps many options open.

🛠️ 2. Erhvervsuddannelser (Vocational Education and Training / EUD)

These prepare you to go straight into a profession, but you can still go to university later with the right add-ons.

- You combine school time with apprenticeships (praktik) in a real workplace.
- Examples: Electrician, carpenter, hairdresser, chef, IT technician, health care worker, etc.

✅ Choose vocational training if:

- You want hands-on learning.

- You like the idea of earning money during your education.

- You already know what kind of job you'd like.

💡 You can also start with **EUX**, which combines vocational education and academic subjects — so you can go to university *and* become a skilled
