ChatGPT

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Georgia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's great that you've just completed primary school — congratulations! 🎓 Since you're 16, living in Denmark, and fluent in Danish, you have a solid foundation to choose from several educational paths. The best one depends on your interests, strengths, and future goals. Here's a breakdown of your main options in Denmark after **Folkeskole (primary and lower secondary school)**:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

These are general education programs that prepare you for university.

A. STX (Studentereksamen)

- **Focus:** Broad academic subjects (sciences, humanities, languages).
- **Good for:** University plans in a wide range of fields.
- **Length:** 3 years.

B. HHX (Higher Commercial Examination)

- **Focus:** Business, economics, marketing, and international relations.
- **Good for:** Business school or working in finance/trade.
- **Length:** 3 years.

C. HTX (Higher Technical Examination)

- **Focus:** Technology, science, and engineering.
- **Good for:** Engineering, tech studies, or university in STEM fields.
- **Length:** 3 years.

D. HF (Higher Preparatory Examination)

- **Focus:** More practical, for students who want a shorter, more focused academic path.
- **Good for:** Students who may want to go to university but prefer a 2-year program.
- **Length:** 2 years (after 10th grade or if you're a bit older).

🛠️ 2. Erhvervsuddannelser (Vocational Education and Training, EUD)

- **Focus:** Learning a trade or profession like electrician, carpenter, hairdresser, or healthcare worker.

- **Good for:** Getting a job quickly or becoming a specialist in a hands-on field.

- **Length:** 2-5 years (with a mix of school and apprenticeship).

You can also choose **EUX**, which combines vocational training with a more academic program so you can keep the option open to attend university later.

🤔 How to Choose?

Here are some questions to help you reflect:

- **Do you enjoy academic subjects** like languages, science, or history? → Consider STX.

- **Interested in business or international trade?** → Consider HHX.

- **Love tech, computers, or science?** → Consider HTX.

- **Prefer hands-on learning or want to work sooner?** → Consider EUD or EUX.

- **Not sure and want a shorter, flexible academic program?** → Consider HF.

👣 Suggested Next Step

You might also consider taking **10th grade** if you want more time to decide, improve your grades, or explore options.

You can also speak with a **UU-vejleder (youth guidance counselor)** in your kommune — they're there to help students exactly like you make the right choice.

If you'd like, tell me more about your **interests, hobbies, and what kind of job or career you imagine**, and I can help narrow down the best match for you!
