> I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Georgia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
> What educational path would you recommend for me?

Thanks for sharing that — and congrats on finishing primary school! That's a big milestone. Since you're 16, fluent in Danish, and have a multicultural background, you've got some great opportunities ahead of you. Your next step in Denmark typically depends on your interests, strengths, and career goals.

Here's a breakdown of your main options after primary school in Denmark:

🎓 1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are 3-year programs that prepare you for university.

STX (Alment Gymnasium)

- **Focus**: Broad academic subjects like science, humanities, languages.
- **Good for you if**: You want to keep your options open for university.

HHX (Handelsskolens Gymnasium)

- **Focus**: Business, economics, marketing, languages.
- **Good for you if**: You're interested in business or international trade.

HTX (Teknisk Gymnasium)

- **Focus**: Technology, natural sciences, engineering.
- **Good for you if**: You like tech, innovation, or want to study something like IT or engineering later.

HF (Højere Forberedelseseksamen)

- **Focus**: More compact and practical (2 years), for students who may want to enter the workforce sooner or need more flexibility.
- **Good for you if**: You want a shorter route or had challenges in primary school but still want access to higher education.

🛠️ 2. Erhvervsuddannelser (Vocational Education and Training / EUD)

These are more hands-on and career-focused.

- **Focus**: Trades like electrician, mechanic, chef, hairdresser, social care, etc.

- **Good for you if**: You want to start working sooner and enjoy practical learning.

- Often combines school and apprenticeship ("praktik").

- Some programs allow you to later apply to higher education (like erhvervsakademi or professionsbachelor).

🎯 How to Choose?

Here are a few questions to ask yourself:

- Do you like academic learning or hands-on/practical work?

- Are you interested in going to university later?

- What subjects or activities make you feel motivated and energized?

- Do you enjoy working with people, numbers, technology, creativity, etc.?

👥 Your Background as an Advantage

Being bilingual and having roots in Georgia while growing up in Denmark gives you a great edge. You could consider:

- **STX with language focus** (perhaps adding a third language like French or German — or taking Georgian as your "mother tongue" exam if available).

- **HHX** if you're interested in international business or trade — your background can help you bridge cultures.

- **Social or healthcare vocational training** (like SOSU), especially if you're empathetic and like helping people.

🔍 What to Do Next?

- **Talk to a vejleder (student counselor)** at your school or local "UU-vejledning."

- **Visit educational fairs** (like Uddannelsesmesse).

- **Try intro courses ("brobygning")** where you can experience a few days at different schools.

If you tell me more about your interests (e.g., favorite subjects, hobbies, future dreams), I can help you narrow it down even further!
