# Uddannelsesvalg i Danmark

> I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from South Sudan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
> What educational path would you recommend for me?

Thanks for sharing your background — it's a great place to start when thinking about your future. In Denmark, finishing primary school (folkeskolen) at around 16 means you're ready for **upper secondary education (ungdomsuddannelse)**. Here are your main options, depending on your interests and goals:

## 🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academically focused and prepare you for higher education (university or other advanced studies).

**Options:**

- **STX (Studentereksamen)** – Broad academic education, good if you're interested in humanities, science, or social studies.
- **HHX (Handelshøjskoleeksamen)** – Focus on business, economics, and languages. Ideal if you're interested in international business or entrepreneurship.
- **HTX (Teknisk studentereksamen)** – Focus on technology, science, and innovation. Great if you're into engineering, design, or tech.
- **HF (Højere forberedelseseksamen)** – A shorter 2-year academic path, often for those who want a more flexible or mature environment.

💡 **Best if:** You're interested in university later or want to keep many doors open.

## 🛠️ 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These prepare you for a specific job and combine school with hands-on training in a company.

**Examples:**

- **Electrician**
- **Mechanic**
- **Chef**
- **Hairdresser**
- **Healthcare assistant**

💡 **Best if:** You prefer practical work and want to enter the job market sooner — or if you want to become a master craftsman or start your own business.

---

## 💁 3. EUX – Kombination af erhvervsuddannelse og gymnasial uddannelse

This combines vocational training with a general upper secondary education. You'll learn a trade **and** get access to university later.

💡 **Best if:** You want a job after school but also want to keep the option of going to university open.

---

## 🎯 Things to consider:

- **What are your interests?** Do you like working with people, numbers, hands-on work, writing, tech?
- **Do you enjoy studying in a classroom?** Or would you rather be active and learn by doing?
- **Do you have a dream job or field?** Healthcare, IT, business, art, education?

---

## ⏰ My Advice Based on What You've Shared:

Since you're fluent in Danish and grew up in Denmark, you're well-prepared for any path. If you're not sure what you want yet and want to explore options, **STX or HF** could be good starting points. If you're more hands-on or already leaning toward a specific career (like tech, business, or healthcare), consider **HTX**, **HHX**, or **EUX**.

Also: don't be afraid to dream big — there's space in Denmark's system for second chances, changing direction, and lifelong learning.
