Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Spain. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's great to hear — being bilingual and having completed primary school in Denmark gives you a strong foundation. At 16 in Denmark, you're at a key point where most students move on to **upper secondary education** ("ungdomsuddannelse"). Here are the main paths available and what might suit you depending on your interests:

🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

These prepare you for university and are ideal if you enjoy academic subjects.

- **STX (Studentereksamen)** – Broad general education (humanities, science, social studies). Great if you're not yet sure what to specialize in.
- **HHX (Higher Commercial Examination Programme)** – Focus on business, economics, marketing. Good if you're interested in business or entrepreneurship.
- **HTX (Higher Technical Examination Programme)** – Focus on technology, natural sciences, and IT. Ideal for future engineers, programmers, etc.
- **HF (Higher Preparatory Examination)** – Shorter, 2-year program. More flexible and mature environment. Good if you want to get to university faster or took a break.

Good if: You want to go to university later, enjoy school subjects, and like theory and discussion.

🔧 2. Erhvervsuddannelse (Vocational Education and Training – EUD)

These combine school and apprenticeship in a company. You learn a trade (like electrician, chef, carpenter, hairdresser, etc.)

- Takes 2-5 years depending on the path.
- You earn money during your apprenticeship.
- Leads directly to a job, or you can later take *EUX* if you want to keep the university path open.

Good if: You like hands-on work, want a job quickly, or aren't into academic schoolwork.

⚡ 3. EUX – Vocational + Academic Hybrid

Combines a vocational education with general upper secondary subjects — you learn a trade *and* get qualifications for university.

Good if: You want both practical skills and the option to go to university.

🕰️ How to decide?

Ask yourself:

- Do I enjoy academic schoolwork, or do I prefer practical, hands-on tasks?
- Do I want to go to university eventually?
- Am I interested in areas like business, tech, science, or creative arts?
- Do I want to start working soon, or keep studying?

✨ With your background…

Being bilingual and bicultural (Danish + Spanish) is a huge strength — languages, international studies, communication, and business could be great fits.

If you enjoy academic learning, I'd recommend **STX** or **HHX**. If you're more practical-minded, consider **EUD** or **EUX**.

Would you like me to help you compare specific schools or programs near where you live in Denmark? Or maybe give advice based on your interests or career dreams?
