Uddannelsesmuligheder efter folkeskolen

> I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Türkiye. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
> What educational path would you recommend for me?

Thanks for sharing your background — it helps a lot in guiding you properly. Since you've just finished **primary school in Denmark**, you're likely considering one of the **three main post-primary education paths**:

🇩🇰 In Denmark, your next step usually falls into one of these categories:

1. **Gymnasiale uddannelser (General upper secondary education)**
   Ideal if you're considering **university later on**. Main options:
   - **STX (Alment Gymnasium):** Broad focus; good for university prep.
   - **HHX (Handelsskolens Gymnasium):** Focus on business and economics.
   - **HTX (Teknisk Gymnasium):** Focus on science, tech, and design.
   - **HF:** A 2-year general path, often used as a second chance.

2. **Erhvervsuddannelser (Vocational education and training – EUD)**
   For practical, job-oriented education. You learn partly at school and partly as an apprentice in a workplace. Great if you want to:
   - Become a **craftsperson**, **electrician**, **mechanic**, **healthcare assistant**, etc.
   - Enter the job market quickly, often after 4 years or less.
   - Possibly continue later to a higher education like **EUX** or **Erhvervsakademi**.

3. **Kombineret uddannelse (EUX)**
   A mix of vocational and general education — gives you both a **studentereksamen** and a vocational qualification.
   Great if you want job skills **and** the option to go to university later.

🎯 What You Might Consider

To give you a useful recommendation, here are a few questions to reflect on:

- Do you enjoy **academic learning**, or prefer **hands-on/practical** work?
- Are you aiming for **university**, or do you want to **start working earlier**?
- What are your interests — tech, health, design, business, nature, helping people?

✨ Some Pathways Based on Different Goals

Interest Area	Recommended Path	Why?
Science, medicine, social studies	**STX**	Broad academic path, great for uni (medicine, law, teaching, etc.)
Business, marketing, economics	**HHX**	Business-oriented, practical and academic combined
Engineering, tech, design	**HTX** or **EUX Tech**	Practical + scientific focus, good stepping stone to tech careers
Quick path to a trade or job	**EUD** (vocational)	Learn a trade and start working quickly with good pay
Keep doors open (academic + job skills)	**EUX**	Flexible — do a trade + qualify for university too

🧠 Example: If You're Still Unsure

Choose **STX** or **EUX** — they give you flexibility and time to decide while still preparing you for higher education or job opportunities.

If you tell me more about:

- What subjects or activities you like
- What your parents hope for you (if that matters to you)
- Whether you want to stay in Denmark long-term or maybe work in Türkiye one day

...I can give a more tailored suggestion.

Would you like that?
