I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Brazil. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you're fluent in Danish and have finished primary school in Denmark! At 16, you have several good educational paths available depending on your interests, strengths, and long-term goals. I'll lay out the main options and some advice tailored to your background:

◆ Main Educational Paths After Primary School in Denmark

1. Gymnasiale Uddannelser (Upper Secondary Education – Academic)

These are typically 3-year programs preparing you for university:

- **STX (Almen studentereksamen)**
  General academic education with a broad range of subjects.
  Great if you're interested in sciences, humanities, or social sciences and might want to go to university.

- **HHX (Højere handelseksamen)**
  Focus on business, economics, marketing, etc.
  Ideal if you're interested in the business world, entrepreneurship, or commerce.

- **HTX (Højere teknisk eksamen)**
  Focus on technology, IT, science, and engineering.
  Good choice if you enjoy tech, design, or innovation.

- **HF (Højere forberedelseseksamen)**
  Shorter (2 years), more practice-oriented, often for students who want a quicker path to higher education or need more flexible learning.
  Suitable if you want a less theoretical path or need a second chance at upper secondary.

2. Erhvervsuddannelser (VET – Vocational Education and Training)

This combines school and apprenticeship with a company.

- Examples: Electrician, mechanic, chef, hairdresser, health worker, etc.
  You spend part of your time at school and part in real work training.

- You can also **combine VET with EUX**, which gives you both a vocational qualification and a pathway to higher education.
  This is great if you want job skills but might also want to go to university later.

🔹 What Should You Choose?

Here are some guiding questions:

- 🧠 **Do you enjoy academic work and want to go to university?**
  → **STX, HHX, HTX, or HF** are good options.

- 🔧 **Do you like working with your hands or want to enter the workforce quickly?**
  → **VET (Erhvervsuddannelse)** is a solid, respected path.

- 💼 **Interested in starting a business or working in international settings?**
  With your **Brazilian background and Danish fluency**, **HHX** might open international doors.

- 🖥️ **Are you into computers, gaming, or science?**
  → **HTX** could be a great match.

- ❤️ **Want to work in healthcare or social services?**
  → VET programs in **sundheds- og omsorgsfag** or **HF** with a care focus are good paths.

🔹 Bonus Considerations (Based on You)

- **Brazilian roots?** You could consider international studies or languages, maybe even going abroad later.

- **Fluent in Danish?** Great – you won't be held back linguistically, but adding English or Portuguese proficiency might be very useful.

- **Still unsure?** Many Danish schools offer **"brobygning" (bridge-building courses)** where you can try out different programs.

📌 Recommendation Summary

If you're not sure yet but want to keep many doors open:

✅ **STX** – good for general academic skills and a wide range of future university options
✅ **EUX** – if you like practical work but also want a path to higher education
✅ **HHX** – if you see yourself in business, international work, or economics
✅ **Bridge-building course** – to test your interests before committing

If you tell me more about your interests (like subjects you enjoy, hobbies, or what kind of life you imagine in 10 years), I can give you a more personalized suggestion!
