Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Luxembourg. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's a big and exciting moment—congrats on finishing primary school! In Denmark, after primary/lower secondary school (folkeskole), you've got several educational paths to choose from depending on your interests, strengths, and long-term goals.

Here's a breakdown of your options, along with what might suit you best:

🎓 1. General Upper Secondary Education (Gymnasiale uddannelser)

These are great if you're thinking about university later.

Main types:

- **STX (Studentereksamen)** – Broad and academic, with focus on humanities, natural sciences, and social sciences.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and international trade.
- **HTX (Højere Teknisk Eksamen)** – Focus on technology and natural sciences.
- **HF (Højere Forberedelseseksamen)** – Shorter (2 years), for more mature students or those who want to enter professional education quickly.

Best if:
You enjoy school and want to keep your academic options open. Since you're fluent in Danish, you'll fit right in. STX is the most versatile and commonly chosen if you're unsure.

🛠️ 2. Vocational Education and Training (EUD – Erhvervsuddannelse)

Combines school and apprenticeship. You learn a trade (like electrician, carpenter, chef, healthcare worker, etc.).

Best if:
You prefer hands-on learning and want to enter the job market sooner, or work in skilled trades.

💁 3. International or Bilingual Programs

Because of your Luxembourgish background, you might consider:

- **International Baccalaureate (IB)** – Taught in English, internationally recognized. Great if you're thinking of studying abroad or want a more global environment.
- Some Danish schools offer **European School programs** or international lines with more language focus.

Best if:
You're internationally minded, good at English, and might want to study/work outside Denmark or in international settings.

📌 Based on what you've told me:

- You're fluent in Danish and born in Denmark, so you're well-integrated into the local system.
- Your Luxembourgish background might give you a cultural and linguistic advantage if you want to study languages or work in international environments.
- If you're not 100% sure what career you want yet, **STX** or **IB** would keep the most doors open.

👣 Next Steps:

1. **Visit schools** – Most schools have open house events ("informationsaftener").
2. **Talk to a guidance counselor** – Your school or local UU-vejledning can help you make the right choice.
3. **Think about your interests** – Do you like science, literature, tech, or practical work?

Would you like help comparing a couple of programs more closely—like STX vs. IB or EUD vs. HTX?
