

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Norway. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

That's great that you're thinking carefully about your next step — and I can help you explore your options! Since you've finished *folkeskole* (primary and lower secondary school in Denmark), you have several educational paths to choose from depending on your interests, strengths, and future plans. Let's break down the possibilities:

🎓 Upper Secondary Education (Ungdomsuddannelse)

Since you're fluent in Danish and have completed school in Denmark, you're eligible for any of these options:

1 Gymnasiale uddannelser (Academic upper secondary education)

If you enjoy academic subjects and think you might want to go to university later:

- **STX (Almen studentereksamen)** – General upper secondary education with a wide range of subjects (good if you want to keep doors open).
- **HHX (Højere handelseksamen)** – Focus on business, economics, and international subjects.
- **HTX (Højere teknisk eksamen)** – Focus on technology, natural sciences, and technical subjects.
- **HF (Højere forberedelseseksamen)** – A shorter, more practical academic program (2 years), often good for specific professional studies afterward.

2 Erhvervsuddannelser (Vocational education and training, VET)

If you prefer hands-on learning and want to start working or get a skilled trade qualification:

- You can train as e.g. a carpenter, electrician, chef, healthcare assistant, IT supporter, or hundreds of other trades.
- Combines school and apprenticeship/work placement.
- You can also choose **EUX**, which combines vocational training with academic subjects, so you can keep the option of higher education.

☀ Factors to consider

- ✓ What subjects do you enjoy most?
- ✓ Do you prefer practical work or academic studies?

- ✓ Do you already have a career in mind?
 - ✓ Would you like to study in Denmark, Norway, or another country in the future?
-

Special note about your Norwegian background

- Since you have Norwegian parents, you might have the right to study in Norway later on. Choosing a Danish upper secondary education (especially STX, HHX, or HTX) would be well recognized if you ever want to apply to Norwegian universities.
 - If you're interested in keeping both Danish and Norwegian options open, academic upper secondary education is a safe bet.
-

My recommendation

Since you're still young and seem thoughtful about your future, **I'd recommend choosing an upper secondary path that keeps your options open** unless you are sure about a specific trade.

👉 **STX or HHX** could be great choices if you're academically inclined.

👉 **HTX** if you love technology/science.

👉 **EUX** if you want both vocational skills and access to university later.

If you'd like, tell me:

- What are your favorite subjects?
- Do you like school or prefer more hands-on activities?
- Do you already have a dream job or field of interest?

That way, I can give a more tailored recommendation!
