

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Nigeria. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing your background — it's great that you're thinking carefully about your next step! Since you've just finished primary school in Denmark (which I assume means you've completed **folkeskolen** after 9th or 10th grade), you now have several good options depending on your interests, strengths, and long-term goals. Let's break it down:

☀ Main Educational Paths in Denmark After Primary School

Here are the typical choices:

1 Gymnasiale uddannelser (General upper secondary education)

If you want to keep doors open for university later on, these programs are ideal:

- **STX (Alment gymnasium)** – Focus on general academic subjects (languages, science, humanities, social sciences).
- **HHX (Handelsgymnasium)** – Focus on business, economics, marketing, and international trade.
- **HTX (Teknisk gymnasium)** – Focus on technical subjects, technology, natural sciences.
- **HF (Højere forberedelseseksamen)** – A 2-year program (for older students or those who prefer a shorter general upper secondary path).

👉 Recommended if:

You enjoy academic subjects and think you might want to go to university or higher education.

2 Erhvervsuddannelser (Vocational education and training – EUD)

These combine school and apprenticeship at a company. You can train to be:

- A carpenter, electrician, chef, social- and health worker, IT supporter, hairdresser, etc.

👉 Recommended if:

You prefer practical learning, want to work with your hands or in a specific trade, and maybe want to start earning earlier.

3 Kombinerede muligheder

- **EUX (Vocational + gymnasial)** – Gives you both a vocational qualification **and** access to university (double track).

👉 Recommended if:

You want the security of a trade qualification, but also want to keep university as an option.

🕒 How to Choose?

Consider:

- ✓ What subjects do you enjoy most?
 - ✓ Do you like theory and academic work or hands-on/practical tasks?
 - ✓ Do you want to go to university later? Or start working sooner?
 - ✓ Do you want an international angle (e.g. HHX for business, languages)?
-

💡 Example scenarios

- **You like science/technology?** HTX could be a great fit.
 - **You're into business or want to work internationally?** HHX might suit you.
 - **You enjoy languages, history, social studies?** STX is broad and flexible.
 - **You like working with your hands, or a specific trade?** EUD or EUX could be ideal.
-

🌍 Your Nigerian heritage

You could see this as a strength:

- HHX or STX could offer subjects like international business, global studies, or languages where your background is an asset.
 - Some programs offer exchange or international focus — could be interesting if you want to connect Denmark and Nigeria in your future.
-

📌 Next step

👉 Visit **uddannelsesguiden.dk (UG.dk)** — they have a great tool where you can explore the different paths.

👉 Talk to a guidance counselor (uddannelsesvejleder) — most schools arrange meetings before you choose.

If you'd like, tell me:

- What subjects you enjoy most?
- Do you already have any ideas about a future job or area?

I can then give you more tailored advice! 🚀
