

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Algeria. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you're thinking carefully about your next step — and congratulations on finishing primary school! Since you're 16 and living in Denmark, you have several educational options depending on your interests, strengths, and future plans. Let's break it down to help you decide:

Your main educational paths after primary/lower secondary school (folkeskole)

1 Gymnasiale uddannelser (Upper Secondary Education) — Focused on academic subjects, prepares for university

- **STX (Alment gymnasium)** → Broad and academic, many subject combinations (science, humanities, social science)
- **HHX (Handelsskolens gymnasium)** → Business, economics, marketing, international trade
- **HTX (Teknisk gymnasium)** → Focus on technology, science, IT, engineering
- **HF (Højere forberedelseseksamen)** → Shorter (2 years), often more practical, good if you want university access but didn't thrive in traditional school

2 Erhvervsuddannelse (VET - vocational education and training) — More practical, prepares for a job directly

- Example: electrician, carpenter, chef, hairdresser, IT support, health care assistant
- Combine school + apprenticeship (praktikplads)

3 EUX — Combines vocational training *and* gymnasium-level academic subjects

- Good if you want to keep the door open to university while getting a trade qualification

What to consider when choosing:

- ✓ **What subjects do you enjoy most?** Math, science, languages, arts, technology, business?
- ✓ **How do you like to learn?** Do you like theory, books, and essays — or do you prefer hands-on learning?
- ✓ **Do you want to go to university?** If yes → Gymnasium or EUX
- ✓ **Do you want to start working earlier?** If yes → Vocational or EUX
- ✓ **Do you like working with people, machines, computers, or ideas?**

☀️ My suggestion for you (based on what you shared)

Since you're fluent in Danish, finished primary school, and (I assume) have no big language barriers:

- **If you enjoy academic subjects and might want university later:**
 - ☞ Consider **STX** (broadest, most flexible)
 - ☞ Or **HTX** if you like science, tech, or IT
- **If you are more interested in business/marketing:**
 - ☞ **HHX**
- **If you want practical skills and a faster way into work but might also want uni later:**
 - ☞ **EUX** — combines both worlds
- **If you are unsure / want to try different options:**
 - ☞ Some schools offer *brobygning* or *introduktionskurser* where you can test programs

What you can do next

- ✓ Talk to a *studievejleder* (educational counselor) at your school or local *UU-vejledning* — they help with exactly this
- ✓ Visit open house days at local gymnasiums and vocational schools
- ✓ Ask about job shadowing or internships

If you want, tell me:

- ☞ What subjects do you like most?
- ☞ Do you have an idea of a job you might want in the future?

That way, I can give you a more personalized recommendation! 😊
