

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Argentina. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — that gives helpful context! Since you've just finished primary school (which in Denmark usually means **9th grade** or **10th grade if you did an ekstra år**), you're at a key decision point. I'll walk you through some options and factors you might consider, and then give a recommendation based on your situation.

Common educational paths after primary school in Denmark

Here's an overview of your options:

Gymnasiale uddannelser (General upper secondary education)

These prepare you for university:

- **STX** – The general upper secondary school. Broad focus on humanities, science, and social science.
- **HHX** – Business-oriented upper secondary school. Focus on economics, marketing, international trade.
- **HTX** – Technical upper secondary school. Focus on natural sciences, technology, IT.
- **HF** – Shorter (2 years), more practice-oriented. Often for those who want a faster route to higher education.

Erhvervsuddannelser (Vocational education and training)

- Combines school and apprenticeship (praktik). You learn a trade or craft (e.g., electrician, carpenter, chef, health care worker).
- Leads directly to a job but can also open pathways to further education (e.g., erhvervsakademi).

Kombinerede forløb (EUX)

- Mix of vocational training and gymnasium-level studies. Gives both a trade and the possibility for higher education.

Questions to ask yourself

Since I don't yet know your interests, consider:

- Do you enjoy academic subjects and want to go to university? → STX, HHX, HTX, HF

- Do you prefer practical, hands-on learning, or want to enter the workforce sooner? → Vocational (EUD), EUX
- Are you interested in international business, technology, science, or creative fields?
- Do you want the option to study abroad later? All these paths can lead there, but some (like STX or HHX) might be smoother.

Special considerations in your case

- ✓ You're fluent in Danish — that gives you full access to all these programs.
- ✓ Your Argentine heritage could be a strength if you're interested in languages, international trade, or cultural studies (HHX or STX could be good).
- ✓ If you want to keep doors open for university and international opportunities, gymnasiale uddannelser are a safe bet.

My recommendation

Since you're still exploring:

👉 **Consider STX** if you want the broadest academic education and are unsure what you want to study later.

👉 **Consider HHX** if you are drawn to business, economics, or international trade — this could connect well with Argentina/Danish ties.

👉 **Consider EUX** if you like the idea of having both practical skills and a gymnasium-level exam.

You can also visit **ungdomsuddannelses-messer (youth education fairs)**, and talk to a UU-vejleder (youth guidance counselor) to get tailored advice.

✨ Next step:

If you tell me about your interests (e.g., science, languages, technology, arts, hands-on work), I can give you a more precise recommendation!

Would you like help mapping that out?
