

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Austria. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and thoughtful question — and it's wonderful that you're reflecting on your next steps! Since you're 16 and have finished primary school (in Denmark that usually means **folkeskolen**, including 9th or 10th grade), you have several options, depending on your interests, strengths, and future ambitions.

Let me break down your main pathways and what might suit you:

🎓 General Upper Secondary Education

If you enjoy academic subjects and might want to go to university later:

- **STX (Almen studentereksamen)** — a broad, academically focused program with many elective subjects. Good if you like languages, sciences, humanities or social sciences.
- **HHX (Højere handelseksamen)** — business-oriented. Great if you're interested in economics, marketing, international business, etc.
- **HTX (Højere teknisk eksamen)** — technical/scientific focus. Perfect if you're into technology, IT, engineering, or natural sciences.
- **IB (International Baccalaureate)** — offered in some Danish schools. Since you have Austrian roots, you might like this more international environment. The IB is in English and is recognized worldwide.

🔧 Vocational Education and Training (EUD/Erhvervsuddannelse)

If you want to start working sooner or learn a practical trade:

- These programs combine school periods with apprenticeship/work placements.
- Fields range from carpentry, mechanics, electronics, to hairdressing, hospitality, or culinary arts.
- You can still pursue higher education later, especially through **EUX**, which combines vocational training with general upper secondary subjects.

Other options

- **Efterskole** (if you haven't done 10th grade and want a unique year of personal development, sports, arts, or international focus)

- **Folk High School (Højskole)** — usually for people over 17½, but worth keeping in mind for later.

☀ Factors to consider:

- ✓ What subjects or activities do you enjoy most?
- ✓ Do you like learning in a classroom, or do you prefer more hands-on/practical work?
- ✓ Are you thinking of university later on?
- ✓ Would you like to study or work internationally at some point (in Austria, for example)?

🌱 My suggestion

Since you're fluent in Danish, born and raised in Denmark, but also have Austrian background, you might:

👉 **STX or IB** if you want to keep your options open, especially if university or international opportunities appeal to you.

👉 **HHX** if you feel drawn toward business or economics.

👉 **HTX** if you like tech, engineering, or sciences.

👉 **EUX** if you like the idea of learning a trade but still want the option for further studies.

💡 If you tell me a bit more (e.g., what subjects you like most, hobbies, dream jobs, or if you're considering moving to Austria later), I can give you a more tailored recommendation!

Would you like help exploring specific schools or programs near where you live? 🚀
