

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bolivia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! It's great that you're fluent in Danish and have just finished primary school — that's a big milestone. Since you're in Denmark and just finished **folkeskole** (primary/lower secondary education), your next step typically involves choosing between different types of **youth education programs**. Here's a breakdown to help guide your choice, based on your interests and goals:

General Upper Secondary Education (Gymnasiale Uddannelser)

This is the path if you're interested in **university later on**.

- **STX (Studentereksamen)** – Broad academic program with humanities, sciences, and social sciences. Great if you're unsure or want to keep options open.
- **HHX (Higher Commercial Examination)** – Focus on **business, economics, marketing**, and international trade. Good if you're interested in commerce or entrepreneurship.
- **HTX (Higher Technical Examination)** – Focus on **science, technology, and innovation**. Great if you like engineering, IT, or health sciences.
- **HF (Higher Preparatory Examination)** – A shorter (2-year) academic program, more practical and flexible. Often for students who need a more adaptable structure.

✅ **Recommended if** you enjoy school, want to keep many doors open, or plan to go to university later.

Vocational Education and Training (EUD / EUX)

This is the path if you're more **practical or hands-on**, and want to get a job faster or become a skilled professional.

- **EUD (Erhvervsuddannelse)** – Focus on trades like carpentry, electrician, hairdressing, cooking, social and health care.
- **EUX** – A mix of vocational training and academic courses. You get both a trade and the possibility to go to university later.

✅ **Recommended if** you like doing things in real life (not just reading/writing), and want to start working sooner. EUX is great if you want both a job and the option for higher education.

Tips for Choosing:

- Think about your interests: Do you enjoy science, business, languages, tech, or working with your hands?
 - Visit **education fairs (uddannelsesmesser)** or try **introductory courses** (brobygning) to get a feel for each path.
 - Talk to a **student counselor (UU-vejleder)** in your municipality. They're there to help you figure this out.
 - Don't stress about choosing perfectly — the Danish system has **many ways to change direction later**.
-

Bonus Idea:

Given your Bolivian roots, being fluent in **Danish + Spanish** is a huge asset. You could think long-term about careers involving **languages, international business, diplomacy, or NGO work**.

If you want, I can help you create a list of pros and cons for the options you're considering — or even help you find programs near where you live in Denmark. Want to do that?
