

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Brunei Darussalam. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great and important question—choosing your next educational step in Denmark after primary school (or *folkeskolen*) sets the foundation for your future.

Since you're 16 and just finished *9. klasse* (or possibly *10. klasse*), here are your main options in Denmark:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

These are academic paths that prepare you for university:

a. STX (Alment Gymnasium)

- Broad and general education.
- Focuses on humanities, natural sciences, and social sciences.
- Great if you want to keep your options open for university later.

b. HHX (Higher Commercial Examination)

- Focus on business, economics, marketing.
- Ideal if you're interested in commerce, finance, or entrepreneurship.

c. HTX (Higher Technical Examination)

- Emphasizes science, technology, and IT.
- Excellent choice if you're into engineering, design, or computer science.

d. HF (Higher Preparatory Examination)

- Shorter (2 years), more practical.
- For students who maybe didn't thrive in *folkeskolen*, or want a different pace.
- Good if you're mature, motivated, and looking to access higher education faster.

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

- Combines school and paid apprenticeships.
- Leads to becoming a skilled worker (e.g. electrician, carpenter, chef, etc.)

- Great if you enjoy hands-on work and want to start working earlier.

There's also **EUX**, which mixes vocational training with academic qualifications—so you can work or go to university.

How to Choose?

Ask yourself:

- **Do I want to go to university later?** → STX, HTX, HHX, or HF.
 - **Do I prefer hands-on, practical work?** → EUD or EUX.
 - **Do I have a specific interest already?** (tech, business, health, arts?)
 - **Do I want to work soon or study longer?**
-

Bonus: Your Bruneian Background

- This gives you a unique cultural perspective. Consider international studies, language courses, or global business if you're interested in connecting your heritage with your future.
 - If you speak Malay or another language from Brunei, that can also be a plus in diplomacy, translation, or multicultural work.
-

Recommendations (based on your age and background):

- If you're academically curious and unsure yet: **STX** gives you broad options.
 - If you like tech/science and project-based learning: **HTX** is exciting.
 - If you're business-minded: **HHX** can open up that world early.
 - If you want a balance of hands-on and academic: **EUX** is very smart.
-

Would you like help comparing specific schools near where you live in Denmark? Or do you want to tell me a bit more about your interests, so I can make a more tailored suggestion?
