

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Burkina Faso. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you've just finished primary school – congratulations! 🎓 Since you're fluent in Danish and have completed the Danish folkeskole, you now have a few solid options depending on your interests, strengths, and long-term goals.

Here's a breakdown of your main educational paths in Denmark after 9th or 10th grade:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

These are academically focused programs that prepare you for university.

The main types are:

- **STX (Almen studentereksamen)** – Broadest education, includes sciences, humanities, social studies.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and languages.
- **HTX (Højere teknisk eksamen)** – Focus on technical and scientific subjects.
- **HF (Højere forberedelseseksamen)** – Shorter, 2-year academic program. Good if you want to go to higher education but prefer a less intense route.

💡 **Recommended if:** You're interested in going to university or higher education, and you enjoy academic subjects.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These combine school with practical work experience (apprenticeship).

You can become:

- Electrician
- Carpenter
- Mechanic
- Health care assistant
- Hairdresser
- IT support, and many more.

💡 **Recommended if:** You like practical, hands-on work and want to get a job after a few years instead of going to university.

3. Kombinationsforløb (EUX)

EUX combines vocational training with academic subjects, so you get both a trade and the ability to go to university later.

💡 **Recommended if:** You want a practical education **and** want to keep your academic doors open.

What Should You Consider?

Ask yourself:

- Do you prefer academic or hands-on learning?
 - Are you interested in going to university?
 - Do you already have a passion (e.g. health, tech, business, design)?
-

🌟 Personal Recommendation

Since you're young and still exploring, **STX or EUX** might be good paths:

- **STX** gives you time to discover your interests and prepares you for most university programs.
 - **EUX** is great if you're already thinking about a trade (like IT, electrician, or healthcare) but also want the chance to continue your studies later.
-

Next Steps

- Talk to a **UU-vejleder (youth guidance counselor)** – they can help you decide.
 - Visit **uddannelsesguiden.dk** – it's Denmark's official education guide.
 - Try **brobygning** (bridge building programs) to experience different schools before deciding.
-

If you tell me more about your interests (e.g. subjects you enjoy, career dreams), I can give you a more specific suggestion. Want to try that?
