

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Burundi. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great question—and an exciting time in your life! Living in Denmark gives you access to one of the world's strongest education systems, and since you're fluent in Danish and have completed primary school here, you have many good options.

Educational Pathways After Primary School in Denmark

After 9th or 10th grade, students in Denmark typically choose between two main paths:

1. General Upper Secondary Education (Gymnasiale uddannelser)

These programs are more academic and prepare you for university.

Options:

- **STX (Alment gymnasium)** – Focus on general academic subjects like science, languages, and humanities.
- **HHX (Handelssgymnasium)** – Focus on business, economics, and international trade.
- **HTX (Teknisk gymnasium)** – Focus on science, technology, and engineering.
- **HF (Højere forberedelseseksamen)** – A 2-year general program, usually for older students or those who prefer a shorter route.

Recommended if:

You enjoy school subjects, want to keep your options open, or plan to go to university.

2. Vocational Education and Training (EUD / Erhvervsuddannelse)

This combines school with apprenticeship/work experience and leads directly to a job or further study.

Examples:

- Carpenter, electrician, hairdresser, chef, mechanic, IT supporter, health care assistant, etc.

You start with **grundforløb (basic course)** and then move into practical training in a company.

Recommended if:

You want to learn a trade, work with your hands, or earn money sooner.

3. Combination Programs

If you're unsure, there are also programs like **EUX**, which combine vocational training with academic subjects, allowing you to both learn a trade **and** qualify for university later.

Recommended if:

You want practical skills but also want to keep the door open to university.

Other Things to Consider

- **Interests:** What subjects or jobs excite you?
- **Strengths:** Are you more academic or more practical?
- **Future Goals:** Do you dream of going to university? Starting a business? Working right away?
- **Opportunities for bilingual/multicultural students:** Your Burundian heritage and multilingual background can be a big asset in international business, diplomacy, healthcare, or multicultural education.

Suggestions Based on Your Background

Since you're fluent in Danish and have multicultural roots:

- **STX or HHX** could be great if you want to go to university or work internationally.
- **EUX with a business or tech focus** is good if you like working practically but also want long-term flexibility.
- Consider schools that offer international or global studies tracks if you're interested in cross-cultural work.

Final Tip

Visit some schools, talk to counselors (**UU-vejledning** in your kommune), and maybe try a short internship (**praktik**) to see what feels right.

Would you like help finding specific schools or programs near where you live in Denmark?
