

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Chile. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you've just finished primary school in Denmark (which usually means around 9th or 10th grade), your next step depends a lot on your interests, goals, and learning style. Here's an overview of the most common educational paths in Denmark after primary school, tailored to your situation:

🇩🇰 Main Educational Options in Denmark After Primary School

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are 3-year academic programs that prepare you for university. Choose this path if you enjoy academic subjects and think you might want to go to university later.

- **STX (Alment gymnasium)** – General, broad subjects: languages, sciences, humanities. Good for many university paths.
- **HHX (Handelsgymnasium)** – Focuses on business, economics, and languages.
- **HTX (Teknisk gymnasium)** – Focuses on science, technology, IT, and innovation.
- **HF (Højere Forberedelseseksamen)** – 2-year program, less theoretical, more practical. Good if you prefer a shorter option.

✅ Good if you:

- Like academic subjects
- Might want to study at university
- Aren't sure yet and want to keep your options open

2. EUD/Erhvervsuddannelse (Vocational Education & Training)

This is a more practical path where you learn a trade or profession—part school, part apprenticeship. Lasts 3–5 years depending on the field.

Examples:

- Electrician
- Mechanic
- Hairdresser

- Carpenter
- Social and healthcare assistant

✓ Good if you:

- Prefer hands-on learning
- Want to work sooner
- Have a specific trade in mind

3. EUX (Vocational + Academic Combo)

This combines vocational training (EUD) with subjects from gymnasium. You get both a trade **and** the ability to apply to university later.

✓ Good if you:

- Want a job skill *and* the option for higher education
- Are willing to work hard—it's a demanding program!

Your Chilean Background – Why It Matters

Your heritage is a strength. It can:

- Open language or culture-focused career paths (like international business or diplomacy)
- Make you eligible for **exchange programs** or studies abroad
- Help in multicultural work environments

If you're bilingual in Spanish and Danish, that's a big plus—especially in **business, teaching, translation, or international work**.

How to Choose?

Ask yourself:

- Do I like theory or practical work more?
- Do I want to go to university someday?
- What subjects do I enjoy most? (e.g., science, arts, technology, business)
- Do I want to work with my hands or with people?

Not Sure Yet?

That's okay. Many students do a **10th grade (10. klasse)** to get more time to decide. It can also be a chance to:

- Improve your grades

- Explore your interests
 - Get ready for gymnasium or vocational training
-

My Recommendation (Based on What You Said)

Since you're fluent in Danish, born and raised in Denmark, and finishing primary school, here's a **step-by-step suggestion**:

1. **If you're unsure:** Consider 10th grade at an **efterskole** or local school to explore your interests.
 2. **If you like academics or might go to university:** Look into **STX**, **HHX**, or **HTX**.
 3. **If you want a skill and to work sooner:** Consider **EUD** or **EUX**.
 4. **Use your bilingual skills:** Think long-term about careers where Danish + Spanish are an asset.
