

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from China. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — you're at an exciting point in your life! In Denmark, after finishing **primary school (folkeskole)** around age 16, you have several good options depending on your interests, strengths, and future goals. Here's a breakdown of your main paths:

1. Gymnasium (General Upper Secondary Education)

This is the most common path for students planning to attend university later.

Options:

- **STX (Almen studentereksamen)** – Focus on academic subjects like languages, sciences, humanities.
- **HHX (Højere handelseksamen)** – Business-oriented; good if you're into economics, marketing, international trade.
- **HTX (Højere teknisk eksamen)** – Technology and science-focused; ideal if you enjoy math, IT, or engineering.
- **HF (Højere forberedelseksamen)** – A shorter (2-year) program for more mature or practical learners.

Recommended if:

- You enjoy studying and want to keep university open as an option.
- You're not 100% sure yet what you want — it gives flexibility.

2. Erhvervsuddannelse (Vocational Education and Training / EUD)

Combines school and apprenticeship — you learn a trade while working.

Examples:

- Electrician, carpenter, hairdresser, chef, graphic designer, etc.

Recommended if:

- You want to **start working sooner** and like practical learning.
- You're interested in **specific hands-on jobs**.

3. Kombinerede uddannelser (EUX)

A combination of vocational training and academic classes. You get both a **trade** and a **studentereksamen**.

Recommended if:

- You're interested in a skilled trade but still want the **option to go to university later**.

What might suit you?

Since you're fluent in Danish and have a multicultural background, here are some ideas:

- **STX or HHX** could be great if you're open to academic challenges and want to keep your options open.
- If you're interested in **business or international trade** (maybe leveraging your Chinese heritage and language), **HHX** might be a good fit.
- If you enjoy **tech or science**, **HTX** or even **EUX** in IT or engineering could be a great combo.

Final Tips:

- **Visit open houses** ("åbent hus") for local schools — they give a real sense of the environment.
- **Talk to your school counselor** (UU-vejleder) — they can help tailor advice to your local options.
- **Don't stress too much about picking the perfect path** — Denmark's system makes it possible to change paths later.

If you tell me more about your interests (e.g. subjects you like, what you enjoy doing), I can give more specific suggestions!
