

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Colombia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing that! Since you've just finished primary school in Denmark and you're fluent in Danish, you're in a good position to explore several strong educational paths. In Denmark, after completing **folkeskole** (primary and lower secondary education), you typically choose between **academic**, **vocational**, or **combined** educational paths depending on your interests, learning style, and long-term goals.

Here's a breakdown of your main options, along with what kind of student each one suits best:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

This is the academic route, leading to university or other higher education.

Main types:

- **STX** (Almen studentereksamen): Broad, general education – good for university later.
- **HHX** (Højere handelseksamen): Focus on business, economics, and international subjects.
- **HTX** (Højere teknisk eksamen): Focus on science, technology, and innovation.
- **HF** (Højere forberedelseseksamen): A 2-year alternative, often for students who want a shorter route to higher education.

✅ Good for you if:

- You enjoy academic subjects.
- You're considering university in the future.
- You want time to explore different subjects.

🔧 2. Erhvervsuddannelser (Vocational Education and Training, EUD)

This path leads directly to a skilled trade or profession. It combines school and apprenticeship.

Examples:

- Electrician, carpenter, chef, healthcare worker, IT technician.

✅ Good for you if:

- You prefer practical, hands-on learning.

- You want to start working sooner.
- You like the idea of earning while learning (paid internships).

3. Kombinerede forløb (EUX)

This combines vocational training with a gymnasial-level education. You get both a trade and the option to go to university.

✓ Great if:

- You want both academic and practical skills.
- You're unsure whether you want to work or study further.
- You like flexibility and keeping doors open.

4. Something international or bilingual?

Since you have Colombian roots, you might also consider:

- **International Baccalaureate (IB):** An English-language program available at some Danish schools.
- Studying abroad later, or international programs in Denmark.

✓ Good if:

- You want to study or work internationally.
- You're strong in English and enjoy global perspectives.

So, what should you consider?

Ask yourself:

- Do I prefer academic learning or practical experience?
- Am I interested in going to university or starting work sooner?
- What subjects or activities excite me the most?
- Do I want to keep my options open for now?

Suggestion based on your profile:

If you're still exploring your interests, **STX** or **EUX** might be a great fit.

- STX gives you a broad base and time to discover what you like.
- EUX gives you both practical skills and the option for university later – a smart mix.

If you want, I can help you explore specific schools or programs near you in Denmark, or we can go deeper into a certain path you're interested in. Would you like that?
