

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Cuba. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great question, and it's excellent that you're thinking carefully about your next step. Since you've just finished primary school in Denmark (which ends at 9th or 10th grade), you're now likely choosing between several educational paths. In Denmark, the main options after primary school are:

1. Gymnasiale uddannelser (Upper Secondary Education)

These prepare you for university or other higher education.

- **STX (Almen studentereksamen):** Broad academic focus (humanities, science, social studies). Good if you're not sure yet what you want to study later.
- **HHX (Højere handelseksamen):** Focuses on business, economics, and international trade. Great if you're interested in business or entrepreneurship.
- **HTX (Højere teknisk eksamen):** Focuses on science, technology, and engineering. Ideal if you're interested in tech or innovation.
- **HF (Højere forberedelseksamen):** Shorter (2 years), more focused, and for students who may want a quicker route to further education.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These combine school with internships and prepare you directly for a job or a practical career (like electrician, mechanic, chef, hairdresser, etc.).

- You can also go on to higher education later through **EUX**, a combination of vocational training and academic education.

Questions to Ask Yourself

To choose the best path, consider:

- **Do I enjoy academic learning or more practical work?**
- **Do I want to go to university eventually?**
- **Am I interested in business, technology, science, art, or something else?**
- **Would I enjoy working with my hands or in a more active, job-focused way?**

A Few Scenarios

- **You want to keep your options open:**
→ **STX** or **HF** might be best.
 - **You love tech, science, or design:**
→ Consider **HTX**.
 - **You're interested in business or maybe running your own company one day:**
→ **HHX** is a good fit.
 - **You want to start working sooner or prefer hands-on learning:**
→ A **vocational education (EUD or EUX)** might be a good route.
-

Your Cultural Background

Your Cuban heritage is a strength — it means you're likely multilingual or multicultural. This could be a great asset in fields like:

- International business (HHX)
 - Diplomacy, languages, or global studies (STX with a language line)
 - Tourism or hospitality (vocational route)
-

Recommendation

Since you're still young and exploring, I would suggest starting with a **gymnasial uddannelse** like **STX** or **HHX** if you're interested in general studies or business. You can always switch paths or specialize later.

Would you like help comparing specific schools near you, or advice on how to choose a study line within STX or HHX?
