

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Djibouti. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

That's a great question—and an important one. Since you're 16, just finished primary school in Denmark, and you're fluent in Danish, you're at the stage where you're likely choosing between different **youth education programs (ungdomsuddannelser)**. Here are the main options in Denmark, and some advice based on different goals and interests:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academically focused and prepare you for university.

- **STX (Almen studentereksamen)** – Broad and academic. Great if you're not sure what you want yet. Good for university later.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and languages. Good if you like commerce or entrepreneurship.
- **HTX (Højere teknisk eksamen)** – Focus on technology and science. Good if you like IT, engineering, or natural sciences.
- **HF (Højere forberedelseksamen)** – Shorter, 2-year program for those who prefer a more practical approach to university entry. Good for healthcare, pedagogy, etc.

✅ **Recommended if:** You're interested in going to university later, enjoy school, and want time to explore interests.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These combine school and apprenticeship (praktik), preparing you for a job directly.

- Examples: Carpenter, electrician, hairdresser, chef, social- and healthcare worker (SOSU), etc.
- You can always take **EUX**, which combines vocational education with academic subjects, so you keep the option of university later.

✅ **Recommended if:** You like hands-on work, want to start working sooner, or have a specific trade/profession in mind.

A Few Extra Thoughts:

- **You're bilingual** (Danish + your family language), which is a strength! It could help in careers in **healthcare, teaching, social work, translation, or international business**.

- If you're not sure what to do yet, **STX or HF** is often a safe choice. You'll keep your options open.
 - Some schools offer **introductory courses or guidance counseling**—take advantage of them!
-

Next Steps

1. **Visit a UU-vejleder (youth education guidance counselor)** – they can give personal advice and help you apply.
 2. **Think about your interests** – Do you like helping people, building things, learning languages, solving problems?
 3. **Visit schools or open houses (åbent hus)** to see what feels right.
-

If you'd like, I can help you make a more specific plan based on your interests—just tell me what subjects or careers you enjoy or are curious about.
