

# Uddannelsesmuligheder efter Folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Ethiopia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thank you for sharing your background — that gives a great starting point. At 16 in Denmark, having just completed **primary/lower secondary school (Folkeskole)**, you're now choosing between several upper secondary education options. The right path depends on your **interests, strengths, and long-term goals**.

Here's a breakdown of your main options in Denmark after 9th or 10th grade:

## 🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

These are aimed at students who want to go to university afterward.

### A. STX (Studentereksamen)

- Academic and broad — includes languages, science, social studies, and humanities.
- Good if you're not sure what to study later or want lots of options.
- Typically 3 years.

### B. HHX (Higher Commercial Examination Programme)

- Focuses on business, economics, and languages.
- Good for careers in business, trade, or economics.
- Often leads to university or business school.

### C. HTX (Higher Technical Examination Programme)

- Focus on science, technology, IT, and math.
- Great for engineering, tech, or natural science careers.

### D. HF (Higher Preparatory Examination)

- A 2-year program, more compact and practical.
- Good if you want a faster route to further education or university.
- Often used by people who took 10th grade first.

✅ Choose one of these if:

- You like school and learning theory.
- You're considering university.
- You want flexibility for future studies.

## 2. Erhvervsuddannelse (Vocational Education and Training – EUD)

These combine school and apprenticeship.

- Learn a profession (e.g., electrician, carpenter, chef, healthcare worker).
- Mix of classroom and work experience.
- Usually 3-4 years, but you earn money during the apprenticeship part.

### Choose this if:

- You want practical, hands-on work.
- You'd like to earn money while learning.
- You're interested in a skilled trade or specific profession.

### How to Decide:

Ask yourself:

- Do I like academic subjects, or more practical hands-on work?
- Am I interested in business, tech, healthcare, or something creative?
- Do I want to go to university or get a job sooner?

## Your Ethiopian Background – A Strength!

Your cultural background and fluency in Danish give you **a unique perspective**. That could help in:

- **Social work or healthcare** (diverse communities).
- **Language, culture, or global business**.
- **Education** (maybe teaching or mentoring).
- **Entrepreneurship** — combining Danish and Ethiopian roots for something new.

### Keep Options Open

If you're unsure, **STX** or **HF** give you flexibility. You can always switch later or even take **EUX** (a mix of vocational and academic education).

### Suggestion:

If you're academically strong and unsure of your future career:

→ **STX** is a solid and flexible choice.

If you're interested in business and practical skills:

→ **HHX** or **EUX Business** might fit.

If you're interested in a trade or want to work soon:

→ **EUD** (e.g., electrician, mechanic, or healthcare).

---

Would you like help narrowing this down based on your interests (e.g., do you like science, social studies, business, helping others, or working with your hands)?
