

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Fiji. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a big step—congratulations on finishing primary school! 🎓 Since you're 16 and fluent in Danish, you're at a good point to start thinking seriously about your next path. In Denmark, after primary school (folkeskolen), you generally have a few different educational options depending on your interests, goals, and strengths.

Here are the main paths you can consider:

1. Gymnasiale uddannelser (Upper Secondary Education) – If you want to go to university

These are great if you're interested in more academic subjects and may want to pursue higher education later on.

Options include:

- **STX (Studentereksamen)** – General academic program with focus areas like science, languages, or social studies.
- **HHX (Handelshøjskoleeksamen)** – Focus on business, economics, and marketing.
- **HTX (Teknisk studentereksamen)** – Focus on science, technology, and engineering.
- **HF (Højere forberedelseseksamen)** – Shorter and more practice-oriented (2 years). Often used by people who didn't go straight to gymnasium.

🧠 Choose this path if:

- You enjoy school and learning.
- You're curious about subjects like math, languages, science, or social science.
- You might want to study at university later on.

2. EUD (Erhvervsuddannelse) – Vocational Education and Training

This is a more practical path where you learn a trade or profession (like electrician, carpenter, hairdresser, chef, healthcare worker, etc.) through both classroom education and apprenticeships.

🔧 Choose this path if:

- You prefer hands-on learning.
- You're eager to start working and earning money sooner.

- You're interested in a specific trade or job.

Bonus: Some vocational programs also allow you to go on to higher education later if you change your mind.

3. EUX – A mix of academic and vocational

This program combines EUD with general upper secondary education, meaning you can both learn a trade **and** qualify for university later.

 Choose this if:

- You want to keep your options open.
 - You're interested in practical work but also like academic subjects.
-

How to Choose?

Ask yourself:

- Do I want to go to university someday?
 - Do I prefer theoretical or practical learning?
 - What subjects or activities excite me most?
 - Do I want to start working sooner or study longer?
-

Extra Advice (specific to your background):

- Use your bilingual background and cultural experience to your advantage—languages, international business, or global studies could be great fits.
 - Some schools or programs may offer intercultural focus or allow international exchanges.
-

Next Steps:

1. **Book a meeting with an *ungdomsvejleder* (youth guidance counselor)** – Every kommune offers this.
 2. **Visit some schools** – Go to open houses (åbent hus) and talk to students and teachers.
 3. **Try a “brobygning” program** – A short try-out where you experience different school types.
-

Would you like help comparing specific schools or programs in your area? Or do you want to tell me more about your interests and strengths so I can give more personalized suggestions?
