

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Greece. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a big and exciting step — congrats on finishing primary school! 🎉

In Denmark, after primary school (folkeskolen), you have several paths depending on your interests, strengths, and long-term goals. Since you're 16 and have completed primary school, here are the main options you might want to consider:

🎓 1. Gymnasiale Uddannelser (Upper Secondary Education)

These are for students who might want to go to university later. There are different types:

* STX (Studentereksamen)

- Focus: Broad academic education, including sciences, humanities, and languages.
- Good for: Keeping options open for university (general studies).

* HHX (Higher Commercial Examination)

- Focus: Business, economics, international trade.
- Good for: University or jobs related to business, finance, marketing.

* HTX (Higher Technical Examination)

- Focus: Technology, natural sciences, IT, and innovation.
- Good for: University studies in engineering, science, or tech.

* HF (Higher Preparatory Examination)

- Focus: Shorter (2 years), more practical, still leads to university.
- Good for: Those who want a quicker path or a second chance.

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

- Combines school and apprenticeship.
- Good if: You want to work sooner or prefer practical learning.
- Fields: Electrician, carpenter, hairdresser, chef, healthcare worker, etc.

- Can lead to: Jobs right after, or further education (e.g., erhvervsakademi).

Questions to Ask Yourself:

- Do I enjoy studying subjects like math, literature, science, or languages?
- Do I like hands-on learning and doing real-world tasks?
- Am I aiming for university or to start a job/career sooner?
- Would I be excited to work in tech, business, health, or crafts?

Extra tip: Use Your Background

You speak Danish fluently, and with Greek heritage, you may have extra language or cultural skills. This could be valuable in fields like:

- International business (HHX might suit this)
- Tourism and hospitality (EUD with focus on services)
- Languages and humanities (STX with language focus)

Example Paths

You like science and want to study at university

→ Go for **STX** or **HTX**.

You want to work with business or maybe start your own company

→ Try **HHX**.

You enjoy practical work and want to learn a trade

→ Choose an **EUD** program in a field that interests you.

You're not sure yet, but want flexibility

→ STX or HF gives broad knowledge and time to figure it out.

If you want, I can help you explore specific schools or programs near you in Denmark — just let me know your city or region.

Would you like help with that?
