

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Hungary. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.  
What educational path would you recommend for me?

Thanks for sharing that — you're at an exciting point in your life, and it's great that you're thinking ahead. In Denmark, after finishing **primary school (folkeskolen)**, you generally have a few different educational paths to choose from, depending on your interests, goals, and the kind of future you imagine for yourself.

Here's a breakdown of your main options, followed by some personalized advice:

## 1. General Upper Secondary Education (Gymnasiale Uddannelser)

This is best if you're interested in **university** later on.

- **STX (Almen studentereksamen)**: Broad and academic – includes science, humanities, social sciences, etc.
- **HHX (Højere handelseksamen)**: Focus on **business, economics, and marketing**.
- **HTX (Højere teknisk eksamen)**: Focus on **technology, science, and engineering**.
- **HF (Højere forberedelseseksamen)**: A 2-year program – more flexible, often chosen by slightly older students or those wanting a shorter academic route.

### Good if:

- You like academic subjects
- You might want to go to university in Denmark or abroad
- You're still exploring your interests

## 2. Vocational Education and Training (EUD/Erhvervsuddannelse)

This is a more **hands-on** path that leads directly to a job or skilled profession (like electrician, chef, mechanic, hairdresser, etc.).

- You often do **apprenticeships** in real workplaces.
- You can later move on to **shorter higher education** (like Academy Profession (AP) degrees) if you want.

### Good if:

- You want to start working earlier
- You like practical work more than academic subjects
- You already have a profession in mind

## Personalised Recommendations

Since you:

- Are **fluent in Danish**
- Are born and raised in Denmark but with Hungarian roots
- Have just finished **folkeskolen** at 16 (typical age)

Here are some tailored suggestions:

### If you're curious and want to keep your options open:

Go for **STX** – it gives you the broadest foundation and keeps many doors open, including university, business, language studies, or international work. It's also a great place to explore your interests if you're unsure.

### If you're into business, economics, or want to maybe start your own company:

Choose **HHX** – you'll learn about international trade, entrepreneurship, marketing, and economics. If you have Hungarian roots, speaking Hungarian and Danish fluently could be a big advantage in international business later.

### If you're interested in engineering, science, or IT:

Choose **HTX** – this gives you practical and theoretical training in tech, math, and science. Great path toward technical university degrees (like DTU).

### If you're tired of traditional school and want to work sooner:

Look into **EUD** or a **EUX** program (which combines vocational training and a studentereksamen) – great if you want a job quickly, but still want the option to study later.

---

## Bonus Idea – International Options

Because of your Hungarian background and EU citizenship, you could also consider **studying abroad** later or doing **exchange programs** during your gymnasium years. Denmark supports that kind of mobility.

---

Would you like help narrowing it down based on your interests or goals (like "I like science" or "I want to start a business")? That would help me give you an even more specific recommendation.
