

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Iceland. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background—it's great that you're fluent in Danish and have just completed primary school in Denmark. At 16, you're at a key point where your choices can shape your future, but remember: nothing is "final" yet. You can always adjust your path later. Here are the main options in Denmark after primary school (9th or 10th grade), with some recommendations based on your situation and possible goals:

MAIN EDUCATIONAL PATHS IN DENMARK AFTER PRIMARY SCHOOL

1. Gymnasium (STX, HHX, HTX) – 3 years

- **STX (Almen studentereksamen):** Focuses on academic subjects like languages, humanities, and sciences. Good if you're aiming for university.
- **HHX (Højere handelseksamen):** Business, economics, and marketing focus. Good if you're interested in commerce or entrepreneurship.
- **HTX (Højere teknisk eksamen):** Technical and science-based subjects. Ideal if you like tech, engineering, or natural sciences.

 *Recommended if:* You enjoy studying, are interested in university later, or are unsure and want to keep many doors open.

2. EUX – Combines vocational education with a studentereksamen

- Learn a trade (like electrician, carpenter, IT specialist) *and* get qualifications to go to university.
- Takes 4–5 years but gives you both practical skills and academic credentials.

 *Recommended if:* You want to learn a profession but also want the option to continue studying later.

3. Erhvervsuddannelser (EUD) – Vocational education

- Direct path into a trade: chef, mechanic, hairdresser, etc.
- More hands-on than gymnasium, often includes apprenticeships.

 *Recommended if:* You already know what profession you want and prefer practical learning over sitting in a classroom.

4. 10th grade (10. klasse)

- Optional extra year to mature, improve grades, or explore interests before committing to one of the paths above.
- Can be done at a regular school or at a **Efterskole** (a boarding school with focus on specific interests: sports, arts, outdoor life, etc.).

 *Recommended if:* You're unsure what to do next, want more time to decide, or want a unique personal growth experience (especially at efterskole).

OTHER FACTORS TO CONSIDER

Icelandic roots

- You might explore opportunities to connect with education in Iceland in the future. Both countries recognize each other's qualifications.
- If you're bilingual in Icelandic, that could be an asset in international studies or jobs later.

Interests

- Do you enjoy subjects like math, science, languages, or arts?
- Would you rather work with your hands, with people, with ideas, or with tech?

Career goals

- Want to go to university eventually? STX/HHX/HTX or EUX are better.
- Want a skilled trade and quick entry into the workforce? EUD or EUX might suit you.

My Recommendation (based on your info)

If you're not yet 100% sure what you want and are academically capable:

- **Go for STX** if you like a broad education and might want to go to university someday.
- **Consider 10th grade or efterskole** if you want a year to explore, grow socially, or get clarity before choosing.

If you're already passionate about a specific skill or job area (e.g., cooking, programming, mechanics):

- **Look into EUD or EUX** within that field.

Would you like help exploring your interests to narrow it down more? I can guide you through that too.
