

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Kenya. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background — that's a strong foundation to build on. Since you're 16, just finishing **primary school in Denmark** (likely *Folkeskole* up to 9th or 10th grade), you're now at a natural decision point. In Denmark, you have a few main educational options to consider. The right path depends on your **interests, goals, and learning style**.

Main Educational Paths After Folkeskole

1. Gymnasiale Uddannelser (Upper Secondary Education)

These are for students aiming for **higher education (university or college)**.

STX (Almen Studentereksamen)

- Focus: Broad academic subjects (Danish, math, science, social studies, languages, etc.)
- Good if: You want a wide range of university options.
- Duration: 3 years

HTX (Teknisk Studentereksamen)

- Focus: Science, technology, engineering, math (STEM)
- Good if: You like technology, innovation, or want to study something technical later.
- Duration: 3 years

HHX (Handels Studentereksamen)

- Focus: Business, economics, marketing, and international trade.
- Good if: You're interested in business, entrepreneurship, or finance.
- Duration: 3 years

HF (Højere Forberedelseksamen)

- Focus: More practical and flexible, shorter than STX
- Good if: You prefer less pressure or want to go into teacher training, nursing, or other social professions.
- Duration: 2 years

2. Erhvervsuddannelse (Vocational Education and Training – EUD)

- Focus: Practical skills and job training (e.g., electrician, carpenter, hairdresser, healthcare, etc.)
- Combines school and apprenticeship (praktik).
- Good if: You want to **start working earlier** or prefer hands-on learning.
- Leads to jobs or further education (e.g., *EUX* can also lead to university).
- Duration: 2-5 years (depending on field and path)

EUX – A combination of vocational and academic

- Combines EUD + parts of Gymnasium = vocational and academic qualifications.
- Good if: You want a practical skill but also keep your university options open.

How to Choose?

Ask yourself:

1. Do I want to go to university later?

- Yes → STX, HTX, HHX, or EUX

2. Do I prefer practical, hands-on work?

- Yes → EUD or EUX

3. What subjects do I enjoy?

- Math/tech → HTX
- Business/economics → HHX
- General/unsure → STX
- Healthcare, social work → HF or EUD (SOSU)

4. Do I want to start working sooner or explore a profession early?

- Yes → EUD or EUX

Example Pathways Based on Interests

Interest	Recommended Path
University, unsure of major	STX
Engineering, science, tech	HTX
Business, finance, marketing	HHX
Nursing, teaching, social work	HF or EUD (SOSU)
Skilled trade (electrician etc)	EUD or EUX
Mix of hands-on + academics	EUX

My Suggestion for You

Since you're fluent in Danish, grew up here, and just finished Folkeskole, you have **every option open**. Given that you're still exploring, I'd suggest one of these:

✓ **STX or HTX if:**

You want a wide academic foundation and are thinking about university.

✓ **EUX if:**

You like the idea of getting a practical skill **and** keeping university options open.

If you can share a bit about:

- What subjects you like
- If you prefer theory or practical work
- Whether you're thinking about university or working sooner

... then I can help you choose even more specifically.
