

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Kiribati. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that—you're at an exciting point in your life with many possibilities ahead! Since you're 16, just finished primary school in Denmark, and you're fluent in Danish, you're likely transitioning into what Denmark considers *ungdomsuddannelse* (youth education). Here's a breakdown of your main options and some tailored recommendations depending on your interests and goals:

Main Educational Paths in Denmark After Primary School

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are good if you're considering going to university later:

- **STX (Almen studentereksamen)** – Focuses on a broad academic education: humanities, sciences, and social sciences.
- **HHX (Højere handelseksamen)** – Focuses on business, economics, and international relations.
- **HTX (Højere teknisk eksamen)** – Focuses on technology, science, and innovation.
- **HF (Højere forberedelseksamen)** – A 2-year program, more practical and often for students who are a bit older or more mature. It also leads to university.

✅ Choose this path if: You enjoy academic subjects, might want to go to university, and want to keep your options open.

2. Erhvervsuddannelser (Vocational Education and Training - VET)

This combines school and work experience and leads to a specific profession (like electrician, chef, carpenter, child care assistant, etc.)

- Often starts with **EUD** or **EUX**.
 - **EUD** – Vocational education only.
 - **EUX** – Combines vocational training with more academic classes so you can also go to university if you choose.

✅ Choose this path if: You want to learn a trade, start working earlier, or enjoy more practical/hands-on learning.

3. 10. Klasse (Optional)

If you feel unsure or want more time to prepare for the next step, you can take a 10th grade year—especially at an *efterskole*, which can also be a great way to grow socially and personally.

✓ Choose this path if: You're unsure what to do next, want to improve academically, or want a unique life experience in an *efterskole* setting.

What to Consider (Personal Reflection)

Ask yourself:

1. **What subjects do I enjoy most?**
 2. **Do I learn better by doing (praktisk) or by reading and studying (teoretisk)?**
 3. **Do I want to go to university one day?**
 4. **Do I want to start working sooner or study longer?**
 5. **What are my hobbies or dream jobs?**
-

Some Example Scenarios

- **You're interested in science, engineering, or IT** → HTX or EUX with a technical focus.
 - **You like business, marketing, or economics** → HHX or a business-related EUX.
 - **You like working with your hands or helping people directly** → EUD or EUX in a field like health, care, construction, or food.
 - **You're creative and like writing, language, or history** → STX (especially with a humanities focus).
 - **You're not sure at all** → Consider 10th grade (*efterskole* can be a great reset and growth year).
-

Bonus: Your Kiribati Background

That's a unique strength. You could build a future combining intercultural knowledge, international development, or even environmental work (Kiribati is very affected by climate change). Consider paths that allow you to explore international relations, sustainability, or global studies (STX or HHX could be great foundations for that).

Want Help Choosing?

If you'd like, you can tell me a bit more about:

- What subjects you enjoy or are good at
- Any careers you've thought about
- Whether you're more into studying or doing hands-on work

I can then give a more personal recommendation.
