

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Liberia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that! You're in an important transition point in life, and it's great that you're thinking seriously about your next step. In Denmark, after finishing **folkeskolen (primary and lower secondary school)**, you have several strong options depending on your interests, goals, and how you like to learn. Here's a breakdown of the main educational paths you can consider:

## 🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

If you're interested in **academics**, possibly going to **university** in the future, these are good options:

### • STX (Studentereksamen)

- Focus: General academic subjects (languages, science, humanities)
- Best for: Students who are still exploring and want a broad education
- Duration: 3 years

### • HHX (Higher Commercial Examination)

- Focus: Business, economics, marketing
- Best for: Students interested in business or starting their own company
- Duration: 3 years

### • HTX (Higher Technical Examination)

- Focus: Science, technology, IT
- Best for: Students interested in tech, engineering, or science
- Duration: 3 years

### • HF (Higher Preparatory Examination)

- Focus: General education, more practical
- Best for: Students who want a shorter, more flexible path to higher education
- Duration: 2 years

🟢 **Recommendation:** If you enjoy school, are academically inclined, or want to keep your options open for university, **STX or HTX** might be your best bet.

## 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

If you prefer **practical work and learning by doing**, these are great:

- Focus: Hands-on skills and real work experience
- Fields: Health care, electrician, mechanic, chef, carpenter, IT support, etc.
- Leads to: A skilled job or even further education (EUX or more)
- Duration: 2–5 years depending on the program

### • **EUX (Vocational + Academic)**

- Combines: Vocational training with academic upper secondary education
- Good if: You want job skills but also keep the door open to university

 **Recommendation:** If you want to get a job quickly or learn a trade, this is an excellent option. **EUX** is perfect if you want the best of both worlds.

---

### **Personal Advice Based on Your Background:**

- You speak **fluent Danish**, which is a great advantage.
- Being from a Liberian background, you might have **intercultural insights** – this can be valuable in social, healthcare, education, or business fields.
- If you're unsure of your long-term path, **STX or HF** gives you broad access later on.
- If you're motivated to work early or like hands-on work, **EUD or EUX** is more direct and practical.

---

### **What to Ask Yourself:**

- Do I enjoy academic learning or more practical tasks?
- Do I want to go to university?
- Do I want to start earning money sooner?
- Am I interested in technology, business, health, education, or something else?

---

Would you like me to help you compare these paths based on what **interests you** or what kind of **career** you're thinking about? You don't need to decide your whole life now – just the next step that opens the right doors.
