

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Liechtenstein. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.  
What educational path would you recommend for me?

Thanks for sharing that! Since you're 16, fluent in Danish, and just finished primary school in Denmark, you're at an important crossroads. The Danish education system gives you a few strong options after primary school (folkeskole), and the best path depends on your interests, strengths, and goals.

Here's a breakdown of your main options:

## 1. Gymnasiale uddannelser (General Upper Secondary Education)

These are great if you're thinking about **university later**.

- **STX (Alment Gymnasium):** Broad academic education. Great if you're unsure what to specialize in but want to keep university options open.
- **HHX (Higher Commercial Examination Programme):** Focuses on business, economics, and languages.
- **HTX (Higher Technical Examination Programme):** Focus on science, technology, and innovation.
- **HF (Higher Preparatory Examination):** Shorter (2 years), more practice-oriented, suited if you want a faster path to certain higher educations.

 Choose this if:

- You like studying.
- You're considering university later.
- You want to keep your options open.

## 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

If you're more hands-on or want to **start working sooner**, this could be for you.

- Combine school with practical training (apprenticeships).
- Examples: carpenter, electrician, chef, hairdresser, IT technician.

 Choose this if:

- You prefer learning by doing.
- You want to earn money during your education.
- You like a specific trade or profession.

### 3. EUX (Hybrid Option)

Combines vocational training (EUD) **with general subjects from gymnasiet.**

✓ Best of both worlds:

- You get a vocational education.
- You qualify for university as well.

✓ Choose this if:

- You want a trade but might go to university later.
- You like having both academic and practical skills.

---

### Bonus: Your Liechtenstein Background

Your background gives you some interesting advantages:

- You're already bilingual or at least bicultural — valuable for language- and international-related careers.
- If you're considering higher education or work later in **Liechtenstein, Austria, Switzerland, or Germany**, think about learning **German well** (if you don't already speak it fluently).

---

### What You Should Ask Yourself

- Do I enjoy academic work (reading, writing, theory)?
- Do I learn better through doing things?
- Do I already have an interest (science, business, art, mechanics, etc.)?
- Do I want to work soon or study more?

---

### Final Recommendation (if you're unsure)

If you're academically inclined and don't yet know your career path, **STX or HHX** is probably your best bet. You'll get 3 years to figure things out and keep all your options open for university.

If you know you want to work with your hands or have a job earlier, **EUD or EUX** is an excellent path that still leaves doors open.

---

Want help narrowing it down based on your interests or strengths? Let me know what subjects or activities you enjoy, and I can give a more specific recommendation.
