

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Maldives. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you're 16, fluent in Danish, just finished primary school (likely *Folkeskole* in Denmark), and you're considering your next steps, let's look at your main educational options — and what might suit you depending on your interests and goals.

Main Educational Paths After 9th or 10th Grade in Denmark

In Denmark, after finishing *Folkeskole*, you typically have three main paths:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are best if you're aiming for **university** in the future.

- **STX** (*Alment gymnasium*) – Focuses on broad academic subjects (sciences, humanities, social studies).
- **HHX** (*Handelsskole*) – Focus on business, economics, and marketing.
- **HTX** (*Teknisk gymnasium*) – Focus on technology and natural sciences.
- **HF** – Shorter (2 years), more flexible. Good for adults or students needing a second chance.

✅ **Recommended if you enjoy school, academic subjects, and might want to study at university later.**

🎯 *If you're not sure what you want yet, STX is the most flexible.*

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

Prepares you to enter a **trade or job directly**.

- Examples: Electrician, carpenter, chef, health worker, mechanic, etc.
- Mix of school and apprenticeship.
- Takes about 3-4 years, and you get a job qualification.

✅ **Recommended if you prefer hands-on work and want to start working sooner.**

🎯 *Can still lead to further education (like EUX or later VIA University College).*

3. EUX – Combining Vocational and Academic Education

This is a **mix of EUD and gymnasium-level academics**. You get both a trade qualification **and** the ability to apply to university.

✓ Great if you want to keep your options open — practical skills + future studies.

🇩🇰 Special Considerations for You

Given your background as someone with Maldivian roots growing up in Denmark, here are a few extra tips:

- **Language skills:** You might consider learning more languages (e.g., English, German, or even Arabic or Dhivehi), which could help you in international studies or jobs.
- **Diversity & culture:** Think about careers where your unique perspective is valuable — like international business, social work, or global development.

📌 What You Should Ask Yourself

To help decide, think about these questions:

1. Do I enjoy studying subjects like history, math, or science?
2. Do I like working with my hands or doing practical work?
3. Do I want to go to university later?
4. Do I want to start working earlier and be more independent?
5. What are my strengths (social, academic, technical, creative)?

🕒 Recommendation Based on What You've Said

If you're unsure but open to academic paths:

➡ **Go for STX** (Alment Gymnasium) – it gives you the broadest education and most flexibility later.

If you already know you want something more practical:

➡ **Consider EUX** – you'll keep your academic doors open while learning a useful skill.

If you tell me more about your interests (like your favorite subjects, hobbies, or dream jobs), I can give a more specific recommendation!
