

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Marshall Islands. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing a bit about yourself — that helps a lot in giving you good advice. Since you're 16, have completed primary school in Denmark, and are fluent in Danish, you're at the point where you'll choose a youth education path (ungdomsuddannelse). In Denmark, you have several options depending on your interests, strengths, and long-term goals. Here's a breakdown of your main options and what might make sense for you:

🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academically focused and lead to higher education, such as university. There are three main types:

a) STX (Studentereksamen)

- Broadest academically.
- Focus on humanities, science, and social studies.
- Good if you're not sure yet what you want to study later.

b) HHX (Higher Commercial Examination)

- Focus on business, economics, and international trade.
- Great if you're interested in finance, marketing, or international relations.
- Could be a strong fit if you're interested in using your background in global or intercultural contexts.

c) HTX (Higher Technical Examination)

- Focus on science, technology, and innovation.
- Good if you're into IT, engineering, or health sciences.

d) HF (Higher Preparatory Examination)

- Shorter (2 years).
- More mature students or those who didn't follow the typical academic path.
- Can lead to higher education too, but usually vocational-oriented.

Recommended if: You're academically strong, enjoy studying, and might want to go to university later.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

- Combines school and paid apprenticeships in a company.
- Leads to a job as a skilled worker (e.g., electrician, carpenter, chef, healthcare assistant).
- Takes 3-5 years depending on the field.

Recommended if: You prefer practical work, want to earn money during your studies, and may or may not want to go to university later.

3. EUX – Combination of Vocational + Academic Education

- Offers both a vocational education and a studentereksamen.
- Harder, but opens many doors.
- You learn a trade **and** can go to university.

Recommended if: You want the security of a skilled trade **plus** the possibility of university study later.

With Your Background in Mind:

- Being fluent in Danish and having a multicultural background is a big strength — you could succeed in **international business, diplomacy, social work, or education**.
- If you're interested in global issues, cultures, or helping others, HHX, STX, or even EUX could be strong paths.
- If you're more into hands-on work, an EUD or EUX in something like IT, healthcare, or construction might suit you.

Next Steps You Should Take:

1. **Visit an educational counselor** (uddannelsesvejleder) — they're free and very helpful.
2. **Try a “brobygning” or “praktik”** — short trial courses to test different educations.
3. **Look at eVejledning.dk** — it's a government service that gives advice online or by phone.
4. **Think about your interests** — What subjects do you enjoy? Do you like working with people, ideas, or things?

If you tell me a bit more about your interests — like what subjects you enjoyed in school, hobbies, or career dreams — I can give you a more tailored recommendation.
