

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Monaco. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background—you're in a great position to make thoughtful decisions about your future, especially since you're fluent in Danish and have an international family background. Let's walk through your options in Denmark after finishing **primary school (folkeskolen)**, and I'll give you recommendations based on common goals at your age (16).

🎓 Your Main Options After Primary School in Denmark

In Denmark, you typically choose between these broad educational paths:

1. General Upper Secondary Education (Gymnasiale Uddannelser)

This is for you if you're academically inclined or want to keep your options open for university.

- **STX (Alment gymnasium)** – Most common path, broad subjects (science, humanities, languages).
- **HHX (Higher Commercial Exam)** – Focus on business, economics, and international topics.
- **HTX (Higher Technical Exam)** – Focus on technology, science, and engineering.
- **IB (International Baccalaureate)** – Taught in English, globally recognized; great for students with international connections.

✅ Recommended if:

- You want to go to university.
- You enjoy academic work and want a broad education.
- You are considering studying abroad later (especially IB).

2. Vocational Education and Training (EUD / EUX)

A more hands-on education that leads directly to a trade or job, or combines vocational work with academics.

- **EUD** – Apprenticeship-based; prepare for skilled trades (e.g., electrician, chef, carpenter).
- **EUX** – Combines EUD with gymnasium-level academic courses; keeps the door open for university.

✅ Recommended if:

- You prefer practical, hands-on learning.
- You're interested in getting into the workforce quickly or working in skilled trades.

- You like the idea of combining practical and academic learning (EUX is very flexible).

With Your Background: Special Suggestions

Since your parents are from Monaco and you're Danish-born and bilingual, you may want to consider options that keep international doors open:

♦ Consider the International Baccalaureate (IB)

- Ideal if you're thinking of university outside Denmark (like France, Monaco, UK, etc.).
- Often offers subjects in English.
- Strong emphasis on global perspectives and critical thinking.
- Offered in several Danish schools, like **Nyborg Gymnasium**, **Aarhus Statsgymnasium**, and **Copenhagen International School**.

♦ Think about HHX if you're interested in business/economics

- Might be a natural fit if your family background is connected to international business (Monaco is a major financial center).
- Offers courses in international economics, marketing, and business law.
- Teaches practical business skills and may include some English-taught classes.

What You Should Think About Now

Ask yourself:

- Do I enjoy academic schoolwork or prefer practical learning?
- Am I thinking about going to university in Denmark or abroad?
- Do I want to start working soon or keep my options open?
- Am I interested in business, science, arts, technology, or trades?

My Personal Recommendation (Based on Your Info)

Top Recommendation:

 **International Baccalaureate (IB)** – Given your international family background and language skills, it's a flexible, global option that keeps all doors open (university in Denmark or abroad).

Alternative Recommendation:

 **HHX** – If you're interested in business, international economics, or entrepreneurship, this is a great fit and still offers a path to higher education.

If you tell me more about your interests—like what subjects you enjoy, if you like hands-on work, or if you're considering university or a job after school—I can give you more tailored guidance.
