

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mongolia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background — it's great that you're thinking seriously about your next step. Since you've just finished primary school in Denmark (which usually means you've completed **Folkeskole** and are around the end of 9th or 10th grade), you have a few solid options ahead. I'll break down your choices and give you some advice based on your situation.

Your Main Education Options After Folkeskole

1. Gymnasium (General Upper Secondary Education)

- **What it is:** A 3-year academic program (STX, HHX, HTX) that prepares you for university.
- **Good for you if:** You enjoy academic subjects like languages, science, economics, or humanities and are considering higher education (university or university college).
- **Variants:**
 - **STX (Studentereksamen):** General academic with broad subjects.
 - **HHX:** Business-focused (economy, marketing, international trade).
 - **HTX:** Technical/science-focused (math, tech, natural sciences).

2. Erhvervsuddannelse (Vocational Education and Training, VET)

- **What it is:** A mix of school and apprenticeship in a trade or profession.
- **Good for you if:** You want to get a job relatively quickly and prefer hands-on learning.
- **Examples:** Electrician, mechanic, healthcare worker, carpenter, chef.

3. EUX – The Hybrid Option

- **What it is:** A combination of vocational training and a gymnasium-level education.
- **Good for you if:** You want the option to either work after education **or** go to university later.
- **Challenge:** It's a bit more demanding since you do both academic and vocational training.

4. 10th Grade (optional)

- If you feel unsure about what you want next, or want to improve your grades before moving on, many students choose to do 10th grade either at a regular school or in a special 10th-grade center (EFTERSKOLE is also an option here if you want a more social, residential experience).

Personalized Advice for You

Given your situation:

- You're **bilingual** and bicultural (Danish/Mongolian), which is a **huge strength** in both academic and job markets.
- You've grown up in Denmark, so you know the system and speak Danish fluently.
- You're 16, so it's a good time to make a confident choice—but not too late to change direction later.

Ask yourself:

- Do I enjoy school and academic subjects?
- Do I want to go to university?
- Or do I prefer more practical, hands-on learning?

If you enjoy studying and want to **keep your options open**, I'd recommend **Gymnasium or EUX**.

If you're more hands-on and want to **start a career sooner**, consider **VET (Erhvervsuddannelse)** or **EUX**.

Some Next Steps

- **Talk to an educational counselor** (UU-vejleder) — your local municipality has one for youth.
- **Visit schools:** Most Gymnasiums and vocational schools have **open house events** or allow visits.
- **Try internships (praktik)** if you're unsure — they're often arranged through UU-vejledningen.
- **Ask your parents or older students** in your area what they chose and why — even if you do something different, it helps to hear perspectives.

Final Tip

No matter what you choose now, the Danish system makes it **possible to switch paths later**. So don't feel like you have to get it perfect immediately. Focus on what feels like a good fit *for you right now*.

If you tell me more about your interests (e.g., subjects you enjoy, hobbies, what you imagine doing in the future), I can give even more tailored advice.
