

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mozambique. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing that — it's a big moment in your life, and it's great that you're already thinking seriously about your next steps. Since you're 16, have finished *folkeskole* (primary and lower secondary education in Denmark), and are fluent in Danish, you have several solid options depending on your interests, learning style, and future goals.

Here's a breakdown of the main educational paths you can consider in Denmark, with suggestions tailored to your situation:

1. Gymnasium (STX, HTX, HHX) – If you're aiming for university

This is a 3-year general upper secondary education and prepares you for higher education.

- **STX (Alment Gymnasium):** Focuses on general academic subjects like humanities, natural sciences, and social sciences. Great if you're not sure yet what you want to study later.
- **HTX (Teknisk Gymnasium):** Focus on science, technology, and engineering. Good for people interested in tech, science, and innovation.
- **HHX (Handelsgymnasium):** Focus on business, economics, and marketing. Good for those considering a career in business or entrepreneurship.

✅ **Recommended if:** You like school subjects, want to go to university, and enjoy academic learning.

2. EUD (Erhvervsuddannelse) – Vocational education

This path combines school with apprenticeship in a company and prepares you for a job directly.

You can choose from areas like:

- **Technology and construction**
- **Health and care**
- **Hospitality and food**
- **Business and trade**

✅ **Recommended if:** You prefer hands-on learning, want to start working earlier, or are interested in becoming skilled in a trade (e.g., carpenter, chef, electrician, hairdresser, etc.).

3. EUX – Best of both worlds

This is a combination of vocational training (EUD) and academic courses from gymnasium.

You get a vocational qualification **and** a general upper secondary exam (studentereksamen), meaning you can both work in a trade **and** go to university later.

✓ **Recommended if:** You want job skills and the option to study further later.

💡 4. 10th Grade (10. klasse) – If you're unsure

If you're not quite sure what to choose yet, you can take an extra year in **10. klasse**. It gives you time to grow, reflect, and improve your grades if needed.

Some schools offer **efterskole** or **10. klasse centers** that focus on personal development, social life, and career guidance.

✓ **Recommended if:** You're unsure what to do next, want to mature more, or want to explore your interests first.

🌍 5. Consider international or bilingual programs

Since your background is Mozambican and you're fluent in Danish, you could also consider international environments or programs that might build on both.

Some schools offer:

- **IB (International Baccalaureate)** – taught in English and accepted worldwide.
- **Global citizenship or multicultural programs** – more common in urban areas.

✓ **Recommended if:** You're internationally minded or might consider studying or working abroad in the future.

Questions to ask yourself:

- Do I enjoy academic subjects or practical work more?
 - Do I want to go to university, or would I prefer to work sooner?
 - What kinds of careers sound exciting to me?
 - Do I want to stay in Denmark or explore opportunities internationally?
-

If you tell me more about:

- What subjects you like
 - What kind of work you imagine yourself doing
 - Whether you're more hands-on or academic
- I can give you a much more specific recommendation!

Would you like to explore some career ideas together based on your interests?
