

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Nauru. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great to hear you're thinking carefully about your future—it's a big step! Since you've finished **primary school in Denmark**, you're now at the stage where you choose your **youth education** (ungdomsuddannelse). You have several options depending on your interests, goals, and whether you enjoy academic study, hands-on work, or a mix.

Here's a breakdown of your **main options** and when each might suit you:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academic programs that prepare you for university. They take 3 years and include:

- **STX (Studentereksamen)** – General academic, broad subjects.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and languages.
- **HTX (Højere Teknisk Eksamen)** – Focus on technology, science, and IT.
- **HF (Højere Forberedelseseksamen)** – 2-year program, often for students who want a shorter path to higher education.

✓ Good for you if:

- You like school and academic subjects.
- You're thinking about going to university.
- You want to keep your options open.

2. Erhvervsuddannelser (Vocational Education and Training, EUD)

A more practical, hands-on path. You train for specific jobs like mechanic, carpenter, electrician, healthcare worker, hairdresser, chef, etc. Often combines school with internships in companies.

✓ Good for you if:

- You prefer practical, hands-on learning.
- You want to start working earlier.
- You like the idea of earning money while learning (apprenticeships pay a salary).

3. EUX – A Combination Path

EUX combines vocational training **with a higher-level academic curriculum**, so you can both work in a trade **and** go to university later.

✓ Good for you if:

- You want the safety of both options (work or university).
 - You're willing to work hard—it's a challenging program.
-

Important considerations for you specifically:

- You're fluent in **Danish**, which is great—language won't be a barrier.
 - With your **Nauruan background**, you might bring unique perspectives—this could be valuable especially in areas like international studies, social work, or even business.
 - Think about your **interests**—do you enjoy working with people? With your hands? With ideas and theory?
 - Denmark offers **free education** and **student benefits (SU)** once you start a youth education program, so you'll be supported.
-

Still not sure? Here's what to do:

1. Visit an **"UU-vejleder" (youth education counselor)** – they can guide you personally.
 2. Try an **intro course (brobygning)** – you can test different schools and programs before choosing.
 3. Talk to people in different paths – older students, teachers, or family friends.
-

If you tell me more about what you like doing (subjects, hobbies, future dreams), I can give a more specific recommendation. Want to explore that together?
