

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Nicaragua. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself — that helps a lot. Since you just finished primary school in Denmark and you're 16, your next step is typically **ungdomsuddannelse** (youth education). In Denmark, you usually have three main educational paths to choose from after primary school (folkeskole):

🎓 1. Gymnasiale uddannelser (Academic Upper Secondary Education)

If you're interested in continuing with university later, these are the best paths. They last 3 years and focus on general academic subjects.

- **STX (Almen studentereksamen):** Focus on languages, humanities, natural sciences, and social sciences.
- **HHX (Højere handelseksamen):** Focus on business, economics, and international studies.
- **HTX (Højere teknisk eksamen):** Focus on technology, science, and IT.
- **HF (Højere forberedelseseksamen):** A 2-year program, good if you want to move on to short or medium-length higher education programs.

Recommended if:

You enjoy school subjects, are academically motivated, and might want to go to university later (e.g., law, engineering, teaching, psychology, medicine, etc.).

🔧 2. Erhvervsuddannelser (Vocational Education and Training, EUD)

If you're more hands-on or want to work sooner, this is a strong path. You combine school and apprenticeship.

- Areas: Mechanics, carpentry, hairdressing, cooking, health care, IT support, etc.
- Often 3-5 years depending on the trade.
- You get paid during the apprenticeship phase.

Recommended if:

You want practical skills and are interested in starting a career earlier, possibly as a skilled worker or technician.

3. Kombinerede forløb (EUX)

This combines vocational training with academic classes, so you get both a trade and a foundation for university.

Recommended if:

You're not 100% sure yet — maybe you like working practically, but also want the option of university later.

A few extra points for you specifically:

- Being bilingual (Danish + Spanish) is a **big advantage**. You might consider careers in international business, interpreting, teaching, diplomacy, or even healthcare/social work with immigrant communities.
 - If you like **helping people**, HF + a path to teaching, nursing, or social work could be fulfilling.
 - If you enjoy **technology, gaming, or building things**, HTX or EUD (IT or technical trades) might be exciting.
 - If you're not sure, **STX or EUX** keeps many doors open.
-

How to decide?

Ask yourself:

- Do I want to study a lot more, or do I want to start working sooner?
 - What subjects do I enjoy the most?
 - Do I like learning through books, or working with my hands?
 - Do I have a dream job in mind?
-

Would you like help thinking through these questions based on your interests and strengths? If you share more about what you like doing — subjects, hobbies, or goals — I can help you choose more specifically.
